SR
ANYWHERE
HOOK

Installation Guide:

The SR Anywhere Hook is a self-adhesive, semi-permanent wall hook that requires no tools for installation. Holds up to 11 lbs.

Please note that the adhesive may damage paint, stucco, and other wall surfaces when removed, especially after prolonged use. Touch up paint and patching may be required when removed. Do not use on wallpaper or other delicate wall coverings.

For a less-strong adhesive that won't damage wall surfaces, we recommend using 3M Command® Strips (sold separately).

To install: Clean the surface on your wall. Remove adhesive liner. Press to wall and let sit overnight to allow the adhesive to bond properly.

To remove: Twist the hook until it's removed from the wall/surface. If the adhesive remains on the wall, use a putty knife to carefully scrape the adhesive off. You can also use Goo Gone® or similar product to remove residue off the wall. Please note that wall damage may occur requiring touch up.
