Oaxaca

Oaxaca

is a place where tradition persists,
to the delight of anyone who visits.
These new designs want to capture
this timelessness, imagining what might
have inspired the marvelous artisans
that lived here hundreds of years ago.

Penacho

Inspired by the vibrant headdress of Moctezuma, Aztec emperor at the time the Spanish invaded Mexico, Penacho is a symbol of the juxtaposition of the indigenous and the colonist.

This mix of culture is what one sees when they experience Oaxaca.

THE ARTIST:

Rohin is a designer from Austin who invents all types of objects. He received his degree from Elisava in Barcelona and his work has been exhibited at the Salone del Mobile during Milan Design Week and at the Museo Franz Mayer in Mexico City.

While working in Mexico, he became fascinated with how simple shapes of wood could be rotated and intersected together to create a piece of furniture. He couldn't help but use the same approach when creating this collection.
