

FLAMELESS CANDLES (SET OF 12)

Flameless Candles Collection

Commercial grade rechargeable flameless candle sets designed with a unique candle flicker, these candles mimic the natural random flicker of an open flame. Designed to be placed in a variety of candle holders. Due to their clever design they can also be used in non-frosted holders as well as outdoors, which makes them a great choice for humid or wet locations and spa's. Our flameless tea light set is proven to help reduce the costs spent on real flame candles and fuel based paraffin candles. With its sleek design and forward-thinking induction rechargeable system; restaurants, hotels and clubs can provide an ambient candle lighting atmosphere without seeing their profits go up in smoke. The recharging trays can connect to 4 others and charge the candles simultaneously using only power supply (12V 20W required). In just 6 hours, the candles are fully charged and will flicker for up to 12 hours.

GENERAL SPECIFICATIONS

Model Number:	80412-(MP02-019)
Dimensions:	35mm (D) x 5mm (H) - Each tea light
Weight:	0.350kg - Total weight of the Set of 12
Material:	Polypropylene

LIGHT SPECIFICATIONS

Light source:	LED (SMD)
Light power:	0.5W
Kelvin:	2600K
Max lumens:	40 Lm
LED Life:	30,000 hours
Other LED options:	12 colour options + warm white (2600k)
Brightness Levels:	2 settings (0.5W > 0.25W)
Control:	Manual button / Remote control

BATTERY SPECIFICATIONS

Battery type:	Lithium ion polymer
Battery capacity:	800mAh / 3V
Battery life:	500+ charges (not replaceable)
Light time range:	Highest setting - 0.5W = 8 hours Lowest setting - 0.25W = 12 hours

CHARGING SPECIFICATIONS

Charging:	Induction / wireless
Charging time:	up to 6 hours (with 12V 10W adaptor)
Power source:	100-240V Switching power supply. Approved for worldwide usage supplied with a UK (Type G) mains electric plug.
