

HOME COLLECTION

INSTRUCTION MANUAL

Thank you for your purchase of spotLESS Materials Home Collection products! Our goal is to make products that take the effort out of cleaning.

Before applying the coating, please read the following:

Safety

- Wear gloves and mask
- Use in a well-ventilated environment
- Read the product labels fully
- Do not use on surfaces that interact with food

Tips

- These coatings are compatible with glass and ceramic only
- Have glass cleaner handy to remove excess coating that can cause haze

TOILET COATING

Directions:

1. Remove the excess water in the toilet bowl.
2. Clean the toilet surface thoroughly with a toilet cleaner, multipurpose surface cleaner, or rubbing alcohol.
3. Wait until the surface is completely dry before the coating application.
4. Spray spotLESS Toilet Coating onto the toilet surface. Roughly 10 - 15 pumps should be give all you need to cover the toilet surface. Alternately, you can spray the coating onto a paper towel and wipe the toilet surface uniformly.
5. Wait for 5 minutes to cure, and you are done! Make sure you do it in a well ventilated environment and wash your hand afterwards!

Tips:

- Coating may not be as effective on older toilets.
- Toilets with mineral buildup may need additional pre-cleaning.
- Excess coating can be removed with multipurpose cleaner or rubbing alcohol.

SINK & FIXTURE COATING

Directions:

1. Clean and thoroughly dry sink surface thoroughly with multipurpose surface cleaner or rubbing alcohol.
2. Spray spotLESS Sink & Fixture Coating onto the sink surface. Roughly 10 - 15 pumps should be give all you need to cover the surface. Alternatively, you can spray the coating onto a paper towel and wipe the sink surface uniformly.
3. Wait for 5 minutes to cure, and you are done! Make sure you do it in a well ventilated environment and wash your hands afterwards!

Tips:

- Coating only compatible with ceramic surfaces.

GLASS & MIRROR COATING

Directions:

1. Clean glass/mirror thoroughly with multipurpose surface cleaner or rubbing alcohol.
2. Spray spotLESS Glass & Mirror Coating onto the surface. Alternately, you can spray the coating onto a paper towel and wipe the surface uniformly.
3. Wait for 5 minutes to cure, and you are done! Make sure you do it in a well ventilated environment and wash your hand afterwards!

Tips:

- Some glass comes pre-coated with coatings that may not be compatible with the spotLESS Materials Home Collection.
- If you notice a haze, this can be removed with mutipurpose surface cleaner or, more effectively, with rubbing alcohol.

MAINTENANCE SPRAY

The spotLESS Materials Maintenance Spray can be used to enhance the easy-clean performance and extend the longevity of other spotLESS Materials coatings in the Home Collection.

Directions:

1. Spray the Maintenance Spray on a surface that has been pre-coated with spotLESS Materials Toilet Coating, Glass & Mirror Coating, or Sink & Fixture Coating.
2. Wipe with a paper towel/cloth to ensure uniform coverage.

Tips:

- **A little bit goes a very long way, so just one or two sprays is often enough for most home applications.**
- Maintenance Spray is only compatible with other spotLESS Materials Home Collection products and will not adhere to glass/ceramic on its own
