2023 BALL CATALOGUE

THE NEW FOOTBALLS

hyperseam

With the accuracy, speed and power of a stitched ball, and the control and consistency of a bonded ball, Mitre's innovative Hyperseam technology delivers a ball that plays better, lasts longer, and moves faster. Hyperseam. In-play consistency. Low maintenance. High durability.

14-PANEL CONSTRUCTION

Maximum accuracy, without sacrificing speed or power – that's what our 14 panel construction delivers. Our unique 14 panel design remains stable at high speeds with superior aerodynamic control, helping you strike the ball straight into the top corner.

HYPERFLOW EMBOSSED TEXTURING

A unique texturing system which delivers in-flight accuracy by manipulating airflow as the ball travels through air. Our footballs work with gravity and the laws of nature to ensure the game carries on as true as the strikes you produce.

FIFA APPROVED

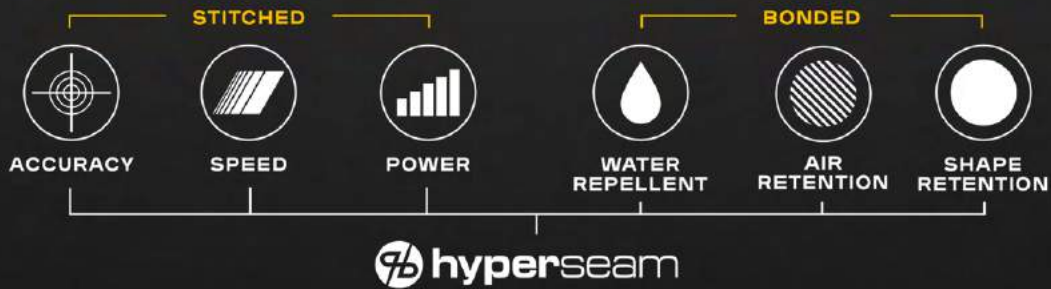

Our footballs are put through their paces and deemed of being the highest standard by the biggest governing football authority in the world. This ensures Mitre Footballs are continuously used in the most elite football competitions globally.

ENGINEERED BY MITRE

In some ways, the world's beautiful game has changed radically in the last decade. There's more glamour, more professionalism, yet at its heart, it's still pretty much the same: one pitch, a pair of goals and two teams competing on the basis of skill and desire.

Football is still played every day on muddy pitches, sun-drenched parks and school playgrounds around the world – this is where the true spirit and buzz of the game is found.

And this is where you'll find Mitre, the world's original football brand.

14 PANEL CONSTRUCTION

Unique configuration of 8 triangles and 6 diamonds provides consistent energy transfer through the ball.

RUBBER PLY

Interceding rubber layer separates foam lining to boost strike power transferred from boot to ball – resulting in exceptional speed and performance.

THE BLADDER

Laminated butyl synthetic bladder is designed to deliver rapid speed, intense power and increased bounce – whilst keeping ball shape throughout intense matches.

HYPERFOAM

Crafted with dual Hyperfoam lining – ensuring maximum power in every strike. A soft-feel and cushioned touch increases player control and confidence on the ball – without compromising power.

EMBOSSED SURFACE

Unique textured surface is engineered to deliver a pure in-flight path, increased grip and ultimate control. Embossed grooves provide up to 400% more stability at speeds of 30-45mph vs a rivalled flat panel construction.

OUTER MATERIAL

Versatile microfibre synthetic-leather outer provides consistency throughout the whole season – with every kick. The tough material resists abrasion and remains sturdy
