- If swallowed** : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.

## 4.2 Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly

## 4.3 Indication of any immediate medical attention and special treatment needed

**Specific treatments** : No specific treatment.

## SECTION 5 • FIREFIGHTING MEASURES

---

### 5.1 Extinguishing media

**Suitable extinguishing media** : Recommended: alcohol-resistant foam, Powders, water spray, Carbon dioxide (CO<sub>2</sub>). For product loss or leakage that has not caught fire, water spray can be used to disperse flammable vapours and protect those trying to stem the leak.

**Unsuitable extinguishing media** : Do not use jets of water. Water is not effective for putting out fires but can be used to cool containers exposed to flames to prevent explosions.

### 5.2 Special hazards arising from the substance or mixture

**Hazards from the substance or mixture** : Excess pressure may form in containers exposed to fire at a risk of explosion. Do not breathe combustion products (carbon oxide, toxic pyrolysis products, etc).

### 5.3 Advice for firefighters

**Special protective equipment for firefighters** : Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations. Suitable respiratory equipment, protective clothing, protective gloves may be required.

## **SECTION 6 • ACCIDENTAL RELEASE MEASURES**

---

### **6.1 Personal precautions, protective equipment and emergency procedures**

Avoid contact with skin and eyes. Wear suitable protective equipment (personal protective equipment listed in section 8 of the safety data sheet). Keep away from sources of ignition. Ensure adequate ventilation. This information applies to both staff working on emergency interventions.

### **6.2 Environmental precautions**

If any spillage occurs, clean it immediately using absorbent material. Do not allow product to reach sewage system or any water course. Inform respective authorities in case of seepage into water course or sewage system.

### **6.3 Methods and materials for containment and cleaning up**

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Do not flush with water or aqueous cleaning agents. Dispose contaminated material as waste according to item 13.). Ensure adequate ventilation.

### **6.4 Reference to other sections**

See Section 1 for emergency contact information.  
See Section 8 for information on appropriate personal protective equipment.  
See Section 13 for additional waste treatment information.

## **SECTION 7 • HANDLING AND STORAGE**

---

### **7.1 Handling**

**Precautions for safe handling** : Use earthing leads when transferring from one container to another. Operators should wear anti-static footwear and clothing and floors should be electrically conductive. Exclude sources of heat, sparks and open flame. Use only non-sparking tools. Avoid contact with eyes and skin. Avoid the inhalation of dust, particulates and spray mist arising from the application of this preparation. Smoking, eating and drinking should be prohibited in areas of storage and use.

**7.2 Conditions for safe storage, including any incompatibilities** : Store in accordance with local regulations. Keep away from: oxidizing agents, strong alkalis, strong acids. Observe label precautions. Store in closed original container at temperatures between 5°C and 30°C. Keep away from heat and direct sunlight. Keep away from sources of ignition. No smoking. Prevent unauthorized access. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

## SECTION 8 • EXPOSURE CONTROLS / PERSONAL PROTECTION

### 8.1 Control parameters

#### Occupational exposure limits

Ingredient name	Type	Exposure limit values			
		TWA (8 hrs.)		STEL (15 min.)	
		mg/m <sup>3</sup>	ppm	mg/m <sup>3</sup>	ppm
Styrene	TLV-ACGIH	85	20	170	40

### 8.2. Exposure controls

#### Appropriate engineering controls

: Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction.

If these are not sufficient to maintain concentrations of particulates and solvent vapors below the OEL, suitable respiratory protection must be worn.

#### Individual protection Measures

: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn: Chemical splash goggles. Recommended: Use protective goggles with side shields. Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when

handling chemical products. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.

**Environmental exposure controls** : Do not allow to enter drains or watercourses.
