## Five Options - Many Applications

### No Special Tools Required

Unipipe is a modular aluminum piping system available in a broad range of sizes, pressures, and fittings. The heavy-wall pipe is rated for 1015 PSI and no special tools are required for assembly or installation. All piping and fittings are 100% aluminum. It is available in the broadest range of sizes on the market - 3/4" to 10" diameters.

### Pressure Capacity

The Unipipe System is suitable for a very wide pressure ranges from high vacuum to 1000 PSI.

### Vast Temperature Capabilities

Unipipe offers a range of working temperature from -22°F up to 266°F (-30°C up to 130°C).

### Quick & Easy

Unipipe connects together quickly and easily. Only basic, standard tools are required to create complex piping systems. No grooving or crimping are necessary.

### Flexible

Unipipe's range of pipe sizes and fittings offer one of the most convenient, flexible and dynamic piping solutions on the market. It is suitable for many different applications.

### Universal

Unipipe offers the widest product range for the transport of compressed air, inert gases, and vacuum, as well as high pressure air and fluids.

## Gripping Action for Rapid Installation

A system of aluminum piping and fittings that offers fast installation and exceptionally secure joints.

The internal nut and dynamic gripping ring ensure there is no way to separate the pipe from the fittings. This innovative fitting is small and light, making this system one of the most powerful methods for transporting air, gases, and liquids. The plastic ring conveniently identifies the fluid and working pressure for each system.
