

NECKLACE SIZING, WHAT FITS BEST?

We all come in different shapes and sizes. So too should our jewellery. The best way to work out what necklace size will look great on you comes down to a range of factors, that aren't necessarily based on your physical neck size alone. The style of item, and how you are choosing to wear it, as well as the clothing you might choose to wear your necklace or chain with can all play a part.

STANDARD NECKLACE SIZES

Usually 45cm (18") – Common for standard necklaces and pendants worn daily.
For a larger framed person 55cm (22") – Also known as matinee length.

HOW TO MEASURE

OPTION 1:

Use an existing necklace and use a tape measure.

OPTION 2:

Take a piece of string, place it around your neck, and hold the ends together to most closely match the look you wish to achieve, then measure.
