

Plant Belles

New for 2019 The Grande Plant Belles

The NEW taller, wider and heavier Plant Belles, straddle the gap between obelisks and grow-through plant supports. Great for larger freestanding herbaceous plants, unruly shrubs and climbing plants.

These elegant robust steel wire 'Belle' frames offer support for a wide range of needy plants from Hydranga to Clematis. Offering the gardener an opportunity to prune and train plants in any number of creative ways. Try looping and tying Rose branches back to the Belle structure, to create an architectural centerpiece of cascading blooms.

Grande Sidney

117cm tall, 50cm wide
(seen on the left)

Major Lawrence

130cm tall, 53cm wide
(seen in the middle)

Grande George

100cm tall, 80cm wide
(seen on the right)
