

Safe & Simple Magnetic Hanging System

Clik-Clik—It's Quick!

Change signs and décor in seconds — without a ladder!

Short, tall, or extremely tall ceiling?
The Clik-Clik system has
the ideal solution:

Short Ceilings (<12'/3.6 m)

Use Clik-Clik FlushMount Clips to hang your sign close to the ceiling...

step 1

Sliding Dual MagMover 24" PRO

One Button Pole

Thread a Sliding Dual MagMover 24" PRO onto a One Button MagPole.

step 2

Use FlushMount Clips to connect your sign grommets directly to ClikMagnets.

step 3

Slide MagMover heads to align with sign grommets.

step 4

Place ClikMagnets on MagMover heads (Keep rings on the side marked with color).

step 5

Keeping the Pole vertical, extend it to the ceiling, allowing both ClikMagnets to attach to metal (T-bar or girder).

Clik-Clik—Your Sign is Hung!

***Note:** If sign grommets are 24" apart, the 24" MagMover can also be used.

Takedown in seconds:
Slide Magmover heads to align with sign grommets. Rotate both corkscrews on the MagMover. Insert them fully into both ClikMagnet rings and pull. The corkscrews hold the ClikMagnets to safely bring down your sign or display.

Clik-Clik Systems Inc.

ClikMagnets:

Powerful neodymium magnets that 'klik' to the iron in industrial ceilings, and most drop ceiling T-bars, without damage. The rings on ClikMagnets allow a MagMover to easily move them to and from metal. Safety first! Using a MagMover on a MagPole, or other extension pole, keeps your feet on the ground.

Mini (#93503)

Holds up to
3 lbs./1 kg — 50/bag

Super Black (#95288)

Holds up to
10 lbs./4 kg — 10/bag

Regular Black (#94300)

Holds up to
5 lbs./2 kg — 20/bag

Super White (#95277)

Holds up to
10 lbs./4 kg — 10/bag

Regular White (#94299)

Holds up to
5 lbs./2 kg — 20/bag

Round #20 (#95600)

Holds up to
20 lbs./9 kg — 10/bag
(also for use with FlatHat)

Round #10 (#95571)

Holds up to
10 lbs./4 kg. — 10/bag

Wall Clik UFO (#96022)

For vertical metal
Holds up to
8 lbs./3.6kg - 10/bag

Wall Clik HPH (#96024)

For vertical metal
Holds up to
8 lbs./3.6 kg - 10/bag

NOTE: The Clik-Clik system is NOT recommended for use with S-hooks, as items may fall during takedown.

MagMovers:

Patented tools to move ClikMagnets to metal on ceilings, and later remove them. Their corkscrews can be rotated into position for controlled magnet removal. MagMovers fit onto a MagPole and most standard threaded poles.

Single MagMover (#94290)

For items with one attachment point.

Dual MagMover (#10402)

For items with up to two attachment points.

Multi MagMover (#10406)

For flexible items with up to eight attachment points.

24" MagMover (#10242)

Heavy-duty. For items up to two attachment points.

Sliding MagMover 24" PRO (#12402)

Heavy-duty. For items with two attachment points. The 'heads' slide to match the distance between your sign grommets (attachment places). To be used with the FlushMount Clips, FlatHats and Grid Hooks.

LoopLine:

A spool of 2" (5 cm) repeating loops forming a patented line that cuts with scissors. When 2 lines, with the same number of loops, are looped (not knotted) onto a sign or decoration, the display will hang level every time! LoopLine is reusable and allows for quick display changes.

LoopLine CLEAR

- 25 lb. (11 kg) test
- 328'/100 m per spool (#70126)
- 82'/25 m per spool (70166)

LoopLine BLACK

- 25 lb. (11 kg) test
- 328'/100 m per spool (#70124)
- 82'/25 m per spool (70144)

LoopLine Light CLEAR

- 10 lb. (4.5 kg) test
- 64'/50 m per spool (#70165)
- 508'/155 m per spool (#70168)

LoopLine WHITE

- 25 lb. (11 kg) test
- 328'/100 m per spool (#70123)
- 82'/25 m per spool (#70133)

MagPoles:

All extension poles feature standard ACME threads.

One Button MagPole (#11702)

A lightweight, single push-button, aluminum and fiberglass extension pole. Extends from 4'6" to 8' (1.4 m to 2.4 m).

MagPole Mini (# 18012)

Light weight extension pole closes to 3'11"/1.2m and opens to 12'/3.5 m allowing access to ceilings up to 16' (4.8 m) high.

MagPole BLUE (#18000)

A sturdy aluminum and fiberglass extension pole with four push-button sections. Closes to 5' 8" (1.7 m) for easy transport. Opens to 18' (5.5 m), allowing access to ceilings up to 22' (6.71 m) high.

MONSTER MagPole LIME (#18023) EXTRA TALL

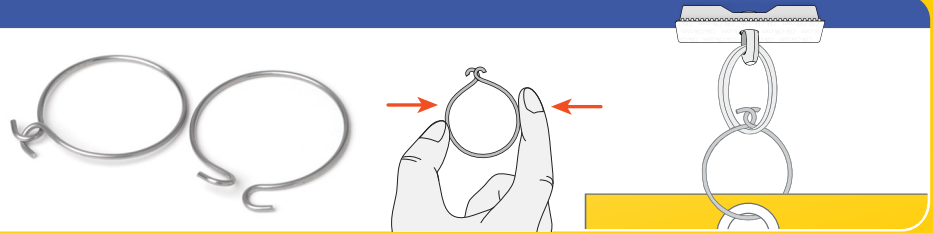

A sturdy aluminum and fiberglass extension pole with five push-button sections. It closes to 6' 8" (2.04 m) and opens to 23' (7 m) allowing access to ceilings up to 27' (8.23 m) high.

Short Ceiling Tools

FlushMount Clips (#29150)

Hang displays close to ceiling by connecting these clips between your ClikMagnets and sign grommets.
- 50/bag.

Extremely Tall Ceiling Tools

Installation of FlatHat

FlatHat (#95500)

There is metal in the FlatHat to receive round ClikMagnets (Mini, Round #10, Round #20). Instead of struggling to lift the ClikMagnet to the metal of extremely tall ceilings, lift the ClikMagnet to the metal of suspended and easy-to-reach FlatHats. See the animation at klik-klik.com.

Kit includes:

20 FlatHats + 20 ClikHoops/bag.

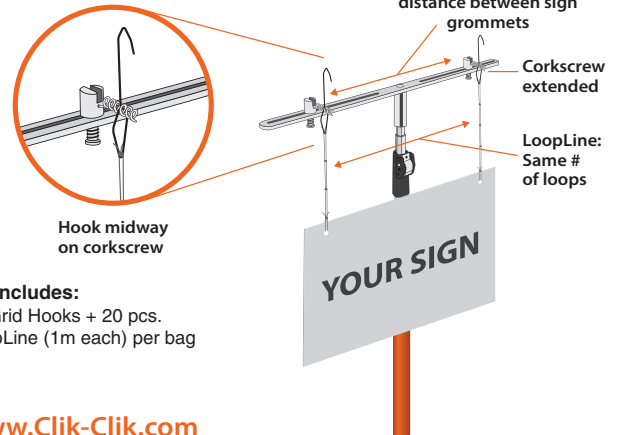

Clik-Clik Banana Kit (#95000)

To install FlatHats. Clik-Clik Banana Kit includes: Banana, Ball Weight (for open beams), Rod Weight (for beams close to ceiling), LoopLine Clear, ClikMagnet Round (Yellow), Scissors, & Single MagMover.

Grid Hook Kit (#29142)

Hooks (and LoopLine) to hang signage from suspended ceiling grids – while standing on the floor.

Kit includes:

20 Grid Hooks + 20 pcs.
LoopLine (1m each) per bag

www.Clik-Clik.com

Stick-n-Clik Kit (#29020)

No metal? No problem!

Kit includes 20 pieces of metal (.75"/19 mm x 2.25"/57 mm), each with permanent 3M VHB adhesive, a Single MagMover and a Mini ClikMagnet. Using these and your MagPole, you can keep your feet on the floor to install the metal onto ceilings (with a smooth, painted surface). [Video on klik-klik.com](http://www.Clik-Clik.com)

What do I need for my project?

Choose one from each of the following:

A. ClikMagnets

- Weight of item to be hung
- Colour of ceiling

B. MagMover (attaches to a MagPole)

- Number of attachment points
- Choose the Sliding Dual MagMover 24" PRO if using Flush Mount Clips on large signage, FlatHats or GridHooks.

C. LoopLine

- Colour
- Weight of item to be hung

D. MagPole

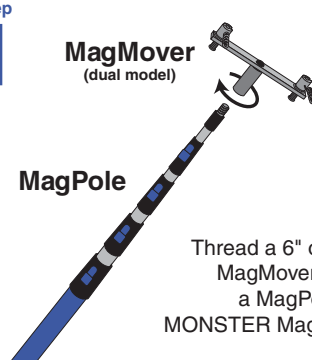

- Ceiling Height

Tall Ceilings (12'–25'/3.6–7.6 m)

Use LoopLine for level displays...

step 1

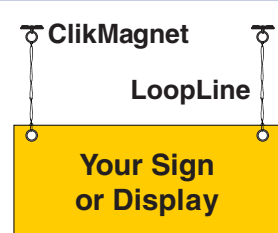

MagMover
(dual model)

MagPole

Thread a 6" or 24" MagMover onto a MagPole or MONSTER MagPole.

step 2

ClikMagnet

LoopLine

Your Sign or Display

Loop the desired lengths of LoopLine (same # of loops) to your item and ClikMagnets. Because NO knots are tied when attaching LoopLine, items hang level. A great time saver!

step 3

Place the ClikMagnets on your MagMover.

step 4

Keeping the MagPole vertical, extend it to the ceiling. Attach one ClikMagnet to metal (T-bar or girder), then walk to the next location and repeat.

Clik-Clik —Your Sign is Hung!

Takedown in seconds:

Rotate a corkscrew on the MagMover. Insert fully into a ClikMagnet ring and pull. The corkscrew holds the ClikMagnet to safely bring down your sign or display.

Extremely Tall Ceilings (>25'/7.6 m)

Lower your installation height by suspending FlatHats from the ceiling with the Clik-Clik Banana Kit. Then, lift Round ClikMagnets (with your sign attached), to the metal in the FlatHats...

step 1

Installation of FlatHat

Use the Clik-Clik Banana Kit to suspend FlatHats and super strong LoopLine PE250 from ceiling beams (full instructions in kit). Easily removed.

Note: Beams don't have to be a specific distance apart.

step 2

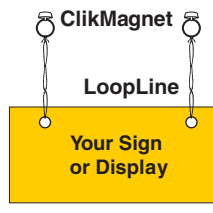

Sliding MagMover 24" PRO

MagPole

Thread a Sliding MagMover 24" PRO* onto a MagPole or MONSTER MagPole.

step 3

ClikMagnet

LoopLine

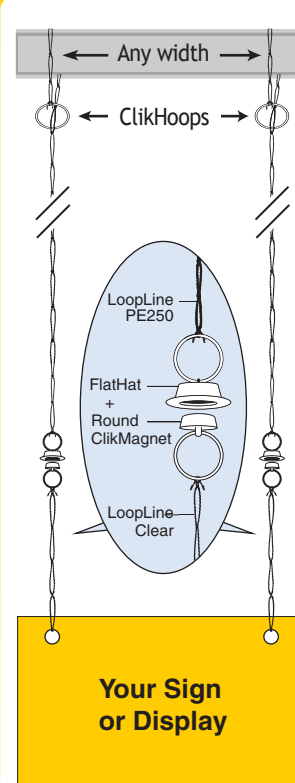

Your Sign or Display

Loop the desired length of LoopLine to your item and Round ClikMagnets.

step 4

Place Round ClikMagnets on MagMover heads (Keep rings on the side marked with color). Slide Magmover heads to align with sign grommets.

← Any width →

← ClikHoops →

LoopLine PE250

FlatHat + Round ClikMagnet

LoopLine Clear

Your Sign or Display

step 5

Keeping the Pole vertical, extend it to the FlatHat height. Attach one ClikMagnet to the metal in a FlatHat, then walk to the next FlatHat location and repeat. **Clik-Clik —Your Sign is Hung!**

*Note: If sign grommets are 24" apart, the 24" MagMover can also be used.

Takedown in seconds:

Slide Magmover heads to align with sign grommets (ESSENTIAL!).

Rotate both corkscrews on the MagMover. Insert them fully into both ClikMagnet rings and pull. The corkscrews hold the ClikMagnets to safely bring down your sign or display.
