

Section 1 - Identification of Chemical, Product and Company

Address: Unit 5/92 Township Drive, Burleigh Heads, Queensland, 4220
Telephone: 07 5576 6388
Web/E-mail: www.elleebana.com or info@elleebana.com
Substance: Component 1. Lift Crème solution
Component 2. Setting Crème solution
Trade name: Elleebana one-shot lift solution
Product Use: For use when lifting eye lashes
Creation Date: November 2017
Revision Date: November 2022

Section 2 - Composition, Information on Ingredients

Pure Substance:

Ingredients I.N.C.I

COMPONENT 1. Lift Solution Crème Gel (W/W)	COMPONENT 2. Setting solution
Thioglycolic Acid 5%	Sodium bromate 5%
Ethanolamine 5%	Polyquaternium-6 1%
Lanolin 0.6 %	Benzyl Alcohol 0.4%
Polyquaternium-6 0.1%	Fragrance 0.3%
Octylphenol Ethoxylate 0.3%	Octylphenol Ethoxylate 0.3%
89% Deionized Water	93% Deionized Water
Chemical Properties:	Crème Solution

Section 3 - Potential Health Effects

Physical Description & Colour: Crème of pale white or yellow tone

Odour: Mild odour

Major Health Hazards: For Professional use only and is a low hazard level. May cause slight stinging. May cause allergic reactions. Irritant to skin and eyes if contact occurs, there for careful observation of the instructions is mandatory and a sensitivity test is advisable. Keep out of reach of children.

Potential Health Effects

Inhalation: Short Term Exposure: Avoid breathing vapour.

Long Term Exposure: No data for health effects associated with long-term inhalation.

Skin Contact: Short Term Exposure: Wash well with water, if allergic reaction - seek medical attention

Eye Contact: Short Term Exposure: This product is believed to be mildly irritating, to eyes, but is unlikely to cause anything more than mild transient discomfort however avoid contact with the eye by careful observation during use and follow all instructions on packaging. If contacts with eyes occur, rinse with water.

Ingestion: Short Term Exposure: No specific information available. Drink plenty of water and seek medical attention.

Carcinogen Status:

ASCC: No significant ingredient is classified as carcinogenic by ASCC.

NTP: No Significant ingredient is classified as carcinogenic by NTP.

IARC: No significant ingredient is classified as carcinogenic by IARC.

Section 4 - First Aid Measures

General Information:

Call The Poisons Information Centre immediately if you feel that you may have been poisoned, burned or irritated by this product. The number is 13 1126 from anywhere in Australia (0800 764 766 in New Zealand) and is available at all times. Please have this Material Safety Data Sheet on hand when you call.

Section 5 - Accidental Release Measures

Accidental Release: This product is sold in small packages, and the accidental release from one of these is not usually a cause for concern. For minor spills, clean up, rinsing to sewer and put empty container in garbage. Although no special protective clothing is normally necessary because of occasional minor contact with this product, it is good practise to wear impermeable gloves when handling chemical products. In the event of a major spill, prevent spillage from entering drains or watercourses and call emergency service.

Section 6 - Handling & Storage

Handling: Keep exposure to this product to a minimum, and ensure the packaging remains sealed until required for use. The measures detailed below under "Storage" should be followed during handling in order to minimise risk to persons using the product in the workplace.

Storage: Store packages of this product in a cool place below 24°C and away from direct sunlight. Check packaging – there may be further storage instructions on the label.

Section 7 - Exposure Controls and Personal Protection

The following Australian Standards will provide general advice regarding safety clothing and equipment:
Respiratory equipment: AS/NZS 1715, Protective Gloves: AS 2161, Industrial Clothing: AS2919, Industrial Eye Protection: AS 1336 and AS/NZS 1337, Occupational protective Footwear: AS/NZS2210.

ASCC Exposure Limits **TWA (mg/m³)** **STEL (mg/m³)**

Exposure limits have not been established by ASCC for any of the significant ingredients in this product.

No special equipment is usually needed when occasionally handling small quantities. The following instructions are for bulk handling or where regular exposure in an occupational setting occurs without proper containment systems.

Ventilation: No special requirements are normally necessary for this product. However make sure that the work environment remains clean and that vapours and mists are minimised.

Eye Protection: Eye protection such as protective glasses is recommended when this product is being used.

Skin Protection: The information at hand indicates that this product is not harmful and that normally no special skin protection is necessary. However, we suggest that you routinely avoid contact with all chemical products and that you wear suitable gloves (preferably elbow-length) when skin contact is likely.

Protective Material Types: There is no specific recommendation for any particular protective material type.

Respirator: Usually, no respirator is necessary when using this product. However, if you have any doubts consult the Australian Standard mentioned above.

Section 8 - Stability and Reactivity

Reactivity: This product is unlikely to react or decompose under normal storage conditions and within expiration recommendation. However, if you have any doubts, contact the supplier. Shelf life for this product is 12 months or immediately after opening.

Conditions to Avoid: This product should be kept in a cool place, preferably below 24°C. Oxidation will occur if the product is not correctly sealed.

Incompatibilities: Water

Fire Decomposition: Only small quantities of decomposition products are expected from this product at temperatures normally achieved in a fire. This will only occur after heating to dryness. Carbon dioxide, and if combustion is incomplete, carbon monoxide and smoke. Carbon monoxide poisoning produces headaches, weakness, nausea, dizziness, confusion, dimness of vision, disturbances of judgement, and unconsciousness followed by coma and death.

Minimum durability before opening: 12 months

Minimum durability after opening: Immediately

Section 9 - Ecological Information

No ecological or special considerations apply for use of normal pack sizes.

Not considered environmentally harmful from normal dilution, expected usage and typical drainage to sewers, septic systems and treatment plants.

Section 10 - Spillage and Disposal Considerations

Spillage: Collect as per Section 6

Method of Disposal: There are many pieces of legislation covering waste disposal and they differ in each state and territory, so each user must refer to laws operating in their area. In some areas, certain wastes must be tracked. The hierarchy of controls seem to be common – the user should investigate: Reduces, Reuse, and Recycle and only if all else fails should disposal be considered. Note those properties of a product may change in use, so that the following suggestions may not always be appropriate.

Package Disposal: Cardboard and Aluminium units are generally recyclable if the product has not been contaminated. Only if neither of these options is suitable should landfill be considered.

Section 15: Regulatory Information

AICS: All of the significant ingredients in this formulation are compliant with NICNAS regulations.

Section 16: Other Information

This MSDS contains only safety-related information. For other data see product literature.
