

# MISSION HORIZON

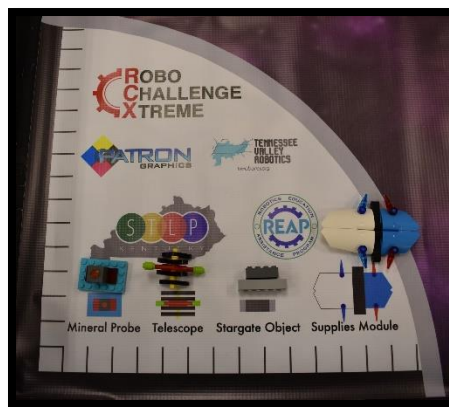

LOOKING TO THE FUTURE

## Mission 11A, Space Station Worker Starting/ Scoring Positions

The intent of this document is to show a close-up view of the mission object's "Starting" and "Scoring" positions in support of the Mission Horizon, Looking to the Future challenge. Make sure to review all of the Mission Horizon Challenge's videos and documents to prepare for this year's challenge. Also, the General Rules have been updated for 2019. Make sure to review the General Rules with your team before you start.

### Starting Position

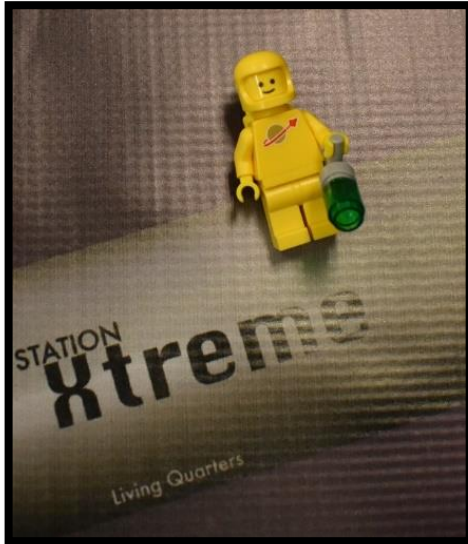

The astronaut minifig will start in the Safe Zone. You may use a minifig from any source to complete this mission.

## Scoring Position

Program your robot to deliver the astronaut to the Living Quarters of the space station. The minifig may touch the mat or be in a capsule. Minifig must be partially or completely over the Living Quarters area of the space station to score. Areas of the space station that are not the Living Quarters do not score.

35 Points

0 Points

***Minifig located at any area other than the Living Quarters, 0 Points***
