

Build Shelter Materials Starting/Scoring Positions

The intent of this document is to show a close-up view of the mission object's "Starting" and "Scoring" positions in support of the Ua Hala Ka Hala Island Adventure Challenge's videos and documents, and the General Rules.

This mission is intended to be accomplished by using Light or Color Sensors. It may be completed in other ways.

Starting Position

Safe Zone

Quad Platform

The Materials will be placed across the line as pictured.

The LEGO of the mission object will cover the long black line and the small black line.

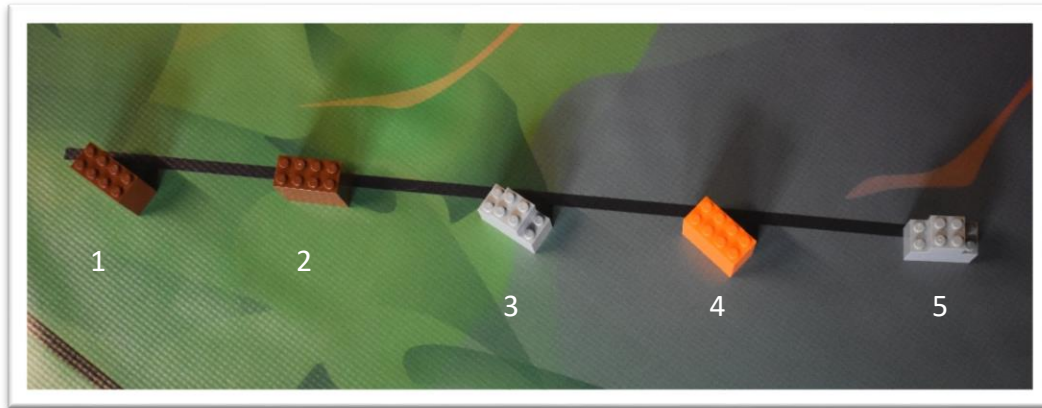

The referee will randomly place the Brown and Grey Materials in any position.

The referee will never place the Orange Material in position 5.

Scoring Position

There are 2 ways to score.

Along the Line

Brown & Grey Materials noticeably moved off the mark **15 Points** each.

Orange Material noticeably moved, **-75% of the point value** of the Brown and Grey Materials.

Example in picture:

Material 1, 3, & 4 are moved.

15 Points, 15 Points, -75%

30 Points - 22.5 Points = 7.5 Points

If only the Orange Material is moved, No Points will be taken.

Materials are scored separately.

Noticeably moved means: Material (any color) can be nudged slightly, but still be on the line, to moved entirely off the line. The Material may be upright or lying on its side.

Delivered to the Safe Zone

Brown & Grey Materials moved to the Safe Zone **25 Points each.**

Partially or Completely in the Safe Zone Score

Touching or not touching score.

Orange Material noticeably moved, **-75% of the point value** of the Brown and Grey Materials.

Materials will be scored where they are located.

Materials are scored separately.

Materials not moved, no score.

Materials noticeably moved, not in the Safe Zone, 15 points each.

Materials moved to the Safe Zone, 25 points each.

Orange Material moved, -75% of all Materials, any location.

Maximum 100 Points
