LATTICE

Lattice is a master at controlling the echo of background chatter and reducing reverberated noise whilst adding a unique piece to any space.

Lattice offers incredible performance by using fins. Because noise operates in different frequencies the various shapes of Lattice are designed to tune into and cut out the babble. Lattice is available in 3 ready to go styles but our design team can create bespoke fins and shapes for your challenge. Lattice is available in a wide range of colours.

But Lattice doesn't only look good, it's high performing as well; specifically designed to reduce and control echo creating a more focused and productive space.

Just like the rest of our range, durability, longevity and performance are assured, leaving nothing left but your creative license.
