Model: SP200
User Guide

Technical Details:
- Model: SP200
- Peak Power: 2400W
- Solar Cell: ADL 60405
- Cell Voltage: 23V
- Output voltage: 26V
- Max Power: 24V
- Open Circuit Voltage: 24V
- Short Circuit Current: 11A
- Operating Temperature: -25°C to 60°C
- Storage Temperature: -25°C to 70°C
- Weight: 5.85kg
- Warranty: 24 months

Safety Tips:
- Do not handle the solar panel directly.
- Do not soak the solar panel into water or other liquids.
- Do not use or store the solar panel near fire or heat sources.
- Do not scratch the solar panel with sharp objects.
- Do not disassemble the solar panel by yourself.
- Do not use corrosive substances on the solar panel.

Warranty:
- 24 months warranty and lifetime technical support.

FAQ (Frequently Asked Questions):

Q: What factors can affect the solar panel conversion rate?
- The temperature.
- The working environment temperature.
- The length of the solar panel.
- The angle of the panel relative to the sunlight.

Q: How to decide the number of solar panels required to recharge?
1. The number of solar panels should be the recommended voltage.
2. The voltage drop in the solar panel should not exceed 5% of the input voltage of the power station.
3. If the output voltage of the solar panel is less than 20%, please make sure that the input voltage of the power station is above the recommended voltage.

Q: Is it waterproof?
In order to maintain the efficiency of the solar panel, please avoid getting wet or subjecting the solar panel to water.
