

Mr Gary Allsopp
Tilebrite Roofing
24 Pinn Street
ST MARYS S.A 5042

Dear Gary

I would like to take this opportunity to thank you and your company for the professional manner in which you carried out your pre-sales advice and detailed information of your product, also the excellent way in which the contract was carried out.

Before the installation of ASTEC E-C 100 CERAMIC, the temperature was unbearable in our upstairs mezzanine area, and was normally two to three degrees celsius above the media advised temperatures. The general ground level areas were also very hot and we found that we lost a great deal of court usage during hot spells.

After the installation of ASTEC E-C 100 CERAMIC, the upstairs area is well below the outside temperatures, and we find that the air-conditioning units in our Centre Court Bar and office are used on considerably less occasions.

The comments from players and coaches have been excellent, as they feel that the building does not become anywhere near as uncomfortable for tennis, and cools down quite rapidly during evenings.

Our centre is open seven days a week, 8.00 am to 12.00 pm on most days, and we welcome any prospective client you may wish to send to Roselands to learn the value of your product.

We would certainly recommend ASTEC E-C 100 CERAMIC to anyone, and wish you and your company success for the future.

Yours Sincerely

Barry L. Pridham
Manager
