7	2	104	3/8" – 16 x ¾" Carriage Bolt
8	1	206	3/8" – 16 x 2" Flat Head Socket Screw
9	2	302	3/8" – 16 Nylon Lock Nut
10	1	823	18" Bungee Cord (Not shown)

ASSEMBLY

1. Attach the blower hook to the blower holder using the 3/8"-16 x 2" flat head socket screw (206) and the locking nut (ATR-LN) as shown in figures 1 & 2. Place the end of the hook through the eye of the spring before securing with the ATR-LN to the locking weldment.
2. Select a suitable location on your trailer for the blower holder. Make sure the blower does not interfere with the trailer rails or mowers when loaded. Mark the location of the 2 holes in the bottom of the blower holder on your trailer. Drill 3/8" holes at each location and attach the blower holder using two 3/8"-16 x 1" carriage bolts (104) and two nylon lock nuts (302).
3. Place all vinyl sleeves on the proper hooks.
4. When transporting your blower, use the optional bungee cord (included) to reduce movement of blower in unit.
