2.1

2.3

2.1   pic.1.2

1.2 SHORT   pic.1

1.2 SHORT

1.2 SHORT

1.Take the Short sidewall (1.2). There are 5 holes for rods in the Short sidewall.

2.Put the round head screw (2.2) into the hole with the metal washer (see pic.1.1)
and screw it into the long nog (1.3).

3.Screw 5 flat head screws (2.1; see pic.1.2) into the long nogs (1.3) through the short sidewall.

STEP 2

Letter L and R inwards

! LONG Part !

2.1

2.3

pic.2.3

pic.2.2

1.Take the Long Sidewall (1.1), Long nog (1.3), Left connector (1.4), and Right connector (1.5).

2. Fasten parts 1.4 and 1.5 with screws (2.1).
 Letters on the Connectors 1.4 and 1.5 should look inwards,as shown in the picture (see pic.2.1).
 Do not tighten the screws 2.1 on the connectors (see pic.2.2).

3. Fasten the rest of the 1.3 using the screws (2.1).
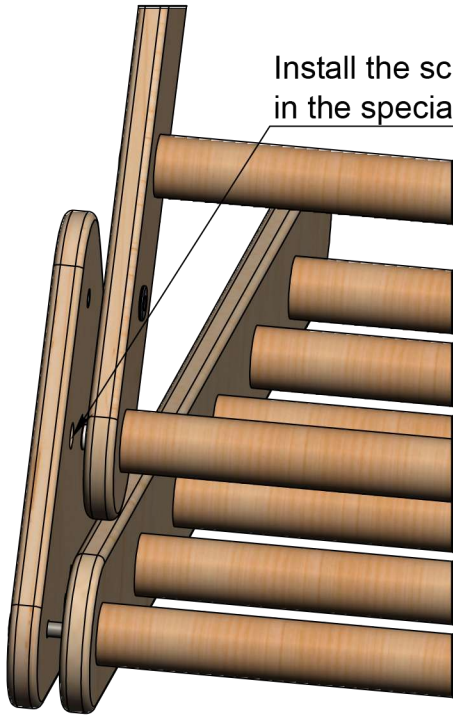

STEP 3

pic.3.1

special hole

pic.3

slighty push apart

slighty push apart

Install the screw head in the special hole

1. Put the short assembled ladder
   (with a protruding screw) on the large assembled ladder.
2. Insert the protruding heads of the screws 2.1
(look at the page #1) into the special holes(see pic.3.1 and pic.3.2).
   You can use level regulator, insert it into the short leg with metal thread through the connector and tighten it. The protruding screw head will easily go into special hole.
3. Tighten all the screws.

pic.3.2

STEP 4

Use level controller 1.6 to change the positon of the triangle
tighten the screws after assembly

1.6 (look at the page #1)

SMALL ARCH ASSEMBLED

ASSEMBLY PARTS

| 1.1	1.2
Arch Sidewall (2pcs)	*Short nog ⌀ 30 mm (6pcs)*
