

Goldair™

Keepin' cool for 40 years

A guide to keeping cool

Goldair™

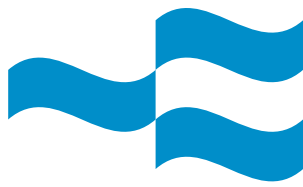

Here at Goldair, we've been on a mission to keep Kiwis cool with innovative and affordable cooling solutions for nearly 40 years and we're not stopping there.

We want to make keeping cool all summer long as simple and easy as possible, so we've created this guide getting rid of the jargon, losing the techno gobbledegook and bringing you the facts to make life easier.

So, what are the best fans to help you stay cool this summer?

Guide to the guide

Room Type:

PERSONAL COMFORT

SMALL 10m²
Small bedrooms, home offices

MEDIUM 10m² - 18m²
Bedrooms, dining rooms
and hallways

LARGE 18m² - 28m²
Lounges, large bedrooms

Fixing Type:

F

Fixed – fans designed to fix on walls

P

Portable – fans that can be moved
from room to room

*Images shown in this guide are a representation of the type of cooling technology. The range in store may differ. You can apply the room size and fixing type to all cooling models.

Helpful Tips

Select a cooling solution that will cool your room or yourself faster and more efficiently. Be sure to turn them off when you're not in the room.

- Wear short-sleeved, loose clothing and drink lots of water to help cool down.
- Draw your drapes, blinds, shades and curtains (particularly on the north side of the house) which can keep heat from getting inside in the first place.
- Open the bathroom window when showering and keep the door closed to vent the heat and humidity outside, rather than back into the house.
- Turn off unnecessary heat-producing electronic appliances when you're not using them.

Model Features

Look for models that have certain features that will assist in keeping you cooling like:

- Oscillation Function – models that have an oscillation feature assist in varying the air flow around a wider room area
- Variable Fan Speed – models that have variable speeds assist in moderating the air flow for better comfort control
- Wi-Fi & Smart Home Enabled – smart models can be controlled through the comfort of your own phone or via voice control
- Remotes & Timers – models that have remotes & timers assist in better managing the usage of the fan

Get Smart

Wi-Fi & Smart Home Integration

Combining modern design with innovative technology, we are leading the charge with our Smart Home seasonal products. All our Wi-Fi enabled products can be paired for free with our very own Goldair app and are Amazon Alexa and Google Home device compatible. With over 20 Goldair Wi-Fi & Smart Home enabled products to choose from, sit back, get smart and keep cool this summer.

Operate your devices conveniently from one place with our very own Goldair app. Pair your Wi-Fi enabled devices by simply downloading the Goldair app from the Apple store or Google Play. For instructions on your individual device, go to:

<https://goldair.co.nz/goldair-app>
or use this handy QR code to get there.

Our app mirrors the functionality of your fan, allowing you to turn on and off, set different modes, or timer functions if they are available on your device. In some models, the app has hidden features not available on your device, such as a full week scheduler opening it up for even more flexibility.

Flexibility

Add unlimited Goldair devices to your app as often as you want

Energy Saving

Promotes energy efficiency by setting timers or schedulers on your devices

Safety First

Our app still maintains all Goldair's high safety standards for your peace of mind

Smart Home

Wi-Fi & Smart Home Integration

Experience the coordination and convenience of home automation by turning your space in to a Smart Home, where your electronic devices can be operated through your Wi-Fi via your phone, or voice assistant device. From light bulbs to security cameras and of course heating and cooling products, Smart Homes are the future in providing you with security, efficiency and flexibility.

We have paired all Goldair Wi-Fi enabled devices to work with Amazon Alexa and Google Home devices with limited voice control functions, giving you flexibility to use your phone or voice to automate the Goldair devices you choose to take home to your new Smart Home World.

We Recommend

Here at Goldair, we embrace the ever-evolving technology world working consistently on our development, engineering and testing of our products to bring the highest standard and quality of cooling devices to New Zealand shores. See below some of our most recommended cooling products compatible with Wi-Fi and Smart Home automation.

GPPF220 45CM PEDESTAL FAN

Ideal for the medium to large rooms

GPTF370 96CM TOWER FAN

Ideal for the medium to large rooms

GCPAC350W 3.53kW PORTABLE AIR CONDITIONER

Ideal for the large rooms

"Alexa, turn my bedroom fan on"

"Hey Google, turn my bedroom fan off"

Ultimate Bedroom Fan

Jet Plane	100dB
Normal Conversation	60dB
Whispering	40dB
Whisper Quiet	39dB
Quiet Bedroom	20dB

Whisper Quiet

At only 39dB, we could say our fans are even quieter than Whisper Quiet, but that's not quite as catchy.

Goldair's Whisper Quiet range use ultra quiet technology making them ideal for bedroom use. Sleep tight!

Great for

- Small to large rooms
- Portability around the home

Features may include:

3 Speed Settings

Tilt Adjustable

Oscillation

Height Adjustable

Timer Function

Carry Handle

3 Wind Modes

Electronic Controls

Remote Control

Whisper Quiet

Works at ultra quiet levels of 39dB making it perfect for night time use

GCDF330B
Also available in white

GCPF340B
Also available in white

Multi Season

Our Multi Season product range will allow you to be efficient in savings and floor space. With fully functional heating capability in winter and a reliable cooling solution for summer, these devices will be your best friend when up against the unpredictable New Zealand weather.

Features may include:

Variable Heat Settings

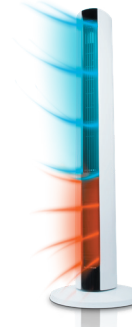

Variable Fan Speeds

Speed Mode

WIFI &
SMART HOME
ENABLED

Tower Fans

Towers are a great option for saving precious floor space and their long grill allows for widespread airflow. Our Multi Season tower range offers multiple heat and fan speed settings, electronic controls, oscillation and an adjustable thermostat.

Portable Air Conditioners and Heat Pumps

Our Multi Season Air Conditioners and Heat Pumps are portable devices ideal for maneuvering from room to room. Simply assemble the included window kit to ensure your unwanted hot or cold air is removed from the room to give you the ideal temperature. Our range offer a wealth of functions such as adjustable speed settings and thermostat, electronic controls, Wifi and dehumidification.

Dehumidifiers

Dehumidifiers are known for winter use due to the need of removing moisture from homes, however they are also very much a necessity in summer- the clue is in the name- to remove humidity from the air. Our dehumidifier range offer both compressor and dessicant types and include features such as multiple speed settings, modes for different room sizes and Wifi.

Personal Fans

Keep cool at work, home or the beach with our Personal Fan range. Ideally sized for your desk or handbag, they provide directional air flow for personal comfort.

Great for

- Personal comfort
- On-the-go cooling

Features may include:

3 Speed Settings

2-6 Hour Run Time

USB Charging Cable

Includes Base Stand

Our pick
