### Mounting Instructions

English

To mount this board you will need:

- Drilling machine.
- 6mm masonry drill bit.
- A hammer.

Note:

- \* The Tru-Fix screws supplied can be hammered straight into position.
- \* Dry wall fixtures are not included.

Slide pen tray (A) packed at the back of the board into frame groove, landscape or portrait as required

Remove plastic corner caps (B) from the frame by lifting.

Remove the Tru-Fix screws (C) from underneath the corner caps.

Note the marked area (D) for drilling. Use a 6mm drill bit (E) to drill through the back of the corner mould (F) and into the wall.

For boards larger than 1500mm, see steps 6, 7 & 8

Hammer screw (G) into position. Take care not to damage corner mould or frame - Replace corner cover.

Mounting brackets packed with pen tray at back of board. Space mounting brackets equally apart (recommended) center to board, top and bottom.

Slide Mounting bracket (H) onto frame. Open cover (I) of mounting bracket. Drill through the hole (J) in the Mounting Bracket.

Place wall plug (K) into hole. Place the screw (L) into the wall plug. Hammer the screw and plug until flush and close mounting bracket cover.

### Instructions de montage

French

Pour assembler ce tableau, il vous faudra:

- une perceuse.
- un foret à béton de 6mm.
- un marteau.

Remarque:

- \* Les vis Tru-fix fournies peuvent être mise position directement au marteau.
- \* Les fixations pour cloison sèche ne sont pas fournies.

Faites coulisser le support de marqueurs (A) à l'arrière du tableau, dans la rainure de cadre, dans le sens portait ou paysage selon besoin.

Enlevez les bouchons de plastique (B) aux coins du cadre en les soulevant.

Enlevez les vis Tru-fix (C) situées au-dessous des bouchons de coins.

Repérez la zone marquée pour le perçage (D). Utilisez un foret de 6mm (E) pour percer à travers l'arrière du coin moulé (F) jusque dans le mur.

Pour les conseils plus grands que 1500 mm, voir des etapes 6, 7 & 8

Enfoncée la vis (G) à cette position avec le marteau. Faites attention à ne pas endommager le coin moulé ni le cadre - remettez en place le bouchon de coin.

Supports de montage emballés avec le support pour marqueurs à l'arrière du tableau. Espacez les supports de montage de façon équidistante (recommandé) du centre du tableau, en haut et en bas.

Faites coulisser le support de montage (H) sur le cadre. Ouvrez le cache (I) du support de montage. Percez à travers le trou (J) dans le support de montage.

Placez la cheville (K) dans le trou. Placez la vis (L) dans le cheville. Enfoncée la vis au marteau jusqu'à ce qu'elle soit affleurante, refermez du cache du support de montage.

## Montagehinweise

Zur Montage der Tafel Benötigen Sie:

- Bohrmaschine.
- 6mm Steinboher.
- Hammer.

Hinweis:

- \* Die Tru-fix-Schrauben können mit dem Hammer in die Wand getrieben werden.
- \* Befestigungsmaterial für Trockenmauern wird nicht mitgeliefert.

Schieben Sie die Stützablageschale (A) an oder Rückseite der Tafel zu finden, im Hochformat oder Querformat in den Schlitz am Rahmen ein.

Heben Sie die Kunststoff-Eckkappen (B) von Rahmen ab.

Entfernen Sie die Tru-fix-Schrauben (C) unterhalb der Eckkappen.

Beachten Sie den zum Bohren markierten Bereich (D). Bohren Sie mit 6mm-Boher durch die Rückwand der Eckvertiefung bis in die Wand.

Für ausschlüsse grösser dass 1500 mm, sieht schritte 6, 7 & 8

Treiben Sie die Schraube (G) mit die hammer ein. Achten Sie darauf, Eckvertiefung und Rahmen nicht zu beschädigen - setzen Sie die Eckkappen wieder auf.

Die Halterungen finden Sie zusammen mit der Stützablageschale an der Rückseite der Tafel. Sorgen Sie für einen gleichmäßigen Abstand der Halterungen vom Mittelpunkt der Tafel, oben und unten.

Schieben Sie die Halterungen (H) auf den Rahmen auf. Öffnen Sie die Abdeckung (I) der Halterung. Bohren Sie durch das Loch (J) in die Halterung.

Schieben Sie den Dübel (K) in das Loch. Setzen die Schraube (L) in den Dübel ein. Treiben Sie die Schraube mit dem hammer bündig ein, schließen Sie die Abdeckung der Halterung.

## Instruções de montagem

Para montar este quadro vai precisar de:

- Berbequim.
- Broca de alvenaria de 6mm.
- martelo.

Nota:

- \* Os parafusos Tru-fix facultados podem ser martelados directamente na sua posição
- \* Fixações de paredes de gesso não incluídas

Faça deslizar a calha de suporte de marcadores (A), embalada na parte posterior do quadro, na ranhura da armação, forma a posicionar o quadro na horizontal ou na vertical, conforme pretendido

Remova as coberturas plásticas (B) canto da armação puxando-as.

Remova os parafusos Tru-fix de debaixo (C) das coberturas de canto.

Tenha em atenção a área marcada (D) para furar. Fure com uma broca de 6mm (E) através da parte posterior do canto (F) furando a parede.

Para tábuas maior que 1500mm, vê passos 6, 7 & 8

Martele os parafusos (G) na sua posição, tenha cuidado para não danificar o canto ou a armação - volte a colocar a cobertura do canto.

Os suportes de montagem estão embalados na parte posterior do quadro juntamente com calha para marcadores. Coloque os suportes de montagem a distâncias equivalentes (recomendado) a partir do centro do quadro, do topo e da base

Instale os suportes de montagem (H) na moldura, fazendo-os deslizar. Abra as tampas (I) dos suportes de montagem. Perure através dos orifícios (J) dos suportes de montagem

Coloque a bucha (K) no buraco. Coloque o parafuso (L) na bucha. Martele o parafuso até este ficar ao nível do suporte, feche a tampa do suporte de montagem.

## Instrucciones de montaje

Para montar esta pizarra necesitará:

- Un taladro.
- Una Broca para ladrillo 6mm.
- Un martillo.

Nota:

- \* Los tornillo Tru-fix suministrados pueden introducirse utilizando un martillo.
- \* No se incluyen accesorios para paredes de yeso.

Deslice la bandeja para rotuladores (A), instalada en la parte trasera de la pizarra, por el surco del marco, endirección horizontal o vertical, según sea necesario.

Extraiga las esquinas de plástico (B) del marco levantándolas.

Extraiga los tornillos Tru-fix (C) situados bajo las esquinas.

Observe el área marcada (D) para la perforación. Utilice una broca de 6 mm para perforar el fondo del molde de esquina y la pared.

Para tablas mas grande que 1500 mm, ven los pasos 6, 7 & 8

Introduzca el tornillo (G) con ayuda de un martillo. Procure no dañar el molde de esquina ni el soporte - vuelva a colocar la esquina.

Soportes de montaje con bandeja para rotuladores en la parte trasera de la pizarra. Coloque los soportes de montaje equidistantes (se recomienda) y centradas en la pizarra, tanto en la parte superior como en la inferior.

Deslice el soporte de montaje (H) en el marco. Abra el tapón del (I) soporte de montaje. Practique un orificio a través del (J) orificio del soporte de montaje.

Coloque un taco (K) en el orificio. Enrosque el tornillo (L) en el taco. Golpee el tornillo con un martillo hasta que quede enrasado. Cierre entonces el tapón del soporte de montaje.
