Analysis Started: **15/03/2022 00:00**

Test Code: **Pest**

Sample Description: **Product Lemon, Ginger and Honey dressing**

Trace Code:

Test	Result	Unit	Method	Notes
Screened pesticides #	Not Detected			

Comments: Where a product has been mixed and/or processed, other factors must be considered in order to determine whether an MRL has been breached.
The consideration of a processing factor for further processed foods within the meaning of Article 20 of Regulation (EC) No 396/2005 (Pesticide Residue Maximum Level Regulation) is only possible if the residue can be traced back to the original product without any doubt.
The standards of article 19 of regulation (EC) 396/2005 (regulation on maximum residue levels of pesticides in or on food and feed) have to be taken into account for each ingredient and raw material used.

Approved

Lauren Scott (Customer Service Manager)

Tests marked * in this report are not included in the UKAS Accreditation schedule for this laboratory.
Tests marked # have been sub-contracted to an ISO17025 accredited laboratory.
Tests marked \$ have been sub-contracted to an ISO17025 accredited laboratory, but are outwith their scope of accreditation
