Wire Placement

PAPIER PLUME

Cut out feather pattern.

Trace pattern onto a piece of paper that has been folded in half, so that you end up with two identical feathers.

Glue wire down the center of first feather, with at least an inch or two of wire exposed at bottom of feather.

Add additional glue to first feather and place second feather on top of first feather, let dry for 10 minutes.

Using fine scissors, cut diagonal snips into feathers, starting from the top and moving down the length of feather.

Add dimension by hand-curling feather snips with small tool, like a fine paint brush handle.

Gather two or three feathers together and tie up with a ribbon for a bunch of feathers.
