THE POWER OF **MONOIONIC**
TECHNOLOGY

catalogue

OF COSMETICS AND DIETARY SUPPLEMENTS

Invex Remedies evolved from the Innovation-Implementation Unit called INWEX, established in 1987 by a brilliant chemist and inventor Stanisław Szczepaniak – a holder of more than 150 patents. His dedication, passion and hard work brought him numerous awards, as well as golden and silver medals at innovation fairs.

We managed to develop an advanced **monoionic technology**, that makes it possible to obtain elemental particles even ten times smaller than nanoparticles used in cosmetology and pharmacology. Monoionic technology is a fundament of Invex Remedies. Our patented technology can provide active ingredients into the body in the most absorbable way.

Thanks to the size of those particles and their **ion pairings**, they are perfectly capable of penetrating the cells to effectively fulfill their functions. Elements of gold, silver, silicon and others used in a monoionic form in cosmetology are appropriately protected against cluster formation. Innovative formulas, on which Invex Remedies cosmetics and diet supplements are based, are protected by numerous patents, patent applications and trademarks.

Dietary Supplement from the **SILOR ORGANIC 1000** Line
Recommended by **STANISŁAW SZCZEPANIAK**

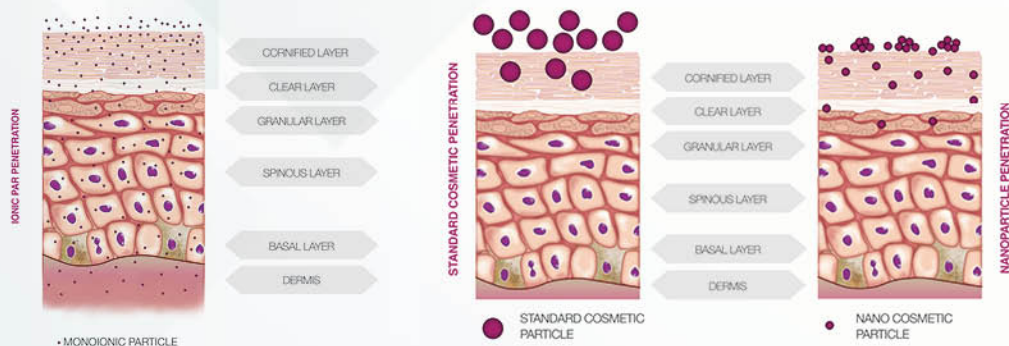

Innovation of **Invex Remedies** cosmetics

Innovation in Invex Remedies means:

- fragmentation of the active substances in the **monoions** form (single dispersed particles with a diameter of 0.1 to 0.5 nm), which are several dozen times smaller than the nanoparticles,
- the advanced technology of **ion pairs** used so far only in modern pharmacology.

0.2 nm monoions of gold, 0.2 nm of silver and 0.24 nm of silica used in Invex Remedies products are several dozen times smaller than the widely used nanoparticles of active substances. Additionally, they do not tend to form clusters.

Consequently, they easily penetrate the epidermis and go directly to the cells in the deeper layers of the skin.

Penetration of active cosmetic ingredients into the skin

Our professional and commercial cosmetic lines can easily be tailored to the needs of every skin, depending on its type, problem and age. Active ingredients included in all our lines are compatible and synergic. Our products were manufactured on a basis of ultra and microelements necessary for the proper functioning of a human body.

All products have been dermatologically tested and their effectiveness has been proved by in vivo tests.

AWARDS, HONOURABLE MENTIONS, CERTIFICATES AND MEDALS

Organic silica with boron (SILOR+B) was awarded Cup, Gold Medal and Diplomas by the International Federation of Inventors' Associations (IFIA), Gold Medal with the Jury distinction at the International Warsaw Invention Show (2010). It won, among others, the Innovation of the Year Award (2010), Golden Emblem in the category of highest quality product in the Quality International 2009, Leader of Innovation and Development, Warsaw 2010 and Cup and Diploma of Poland's Minister of Science and Higher Education.

Monoionic gold (Au100) also earned major awards, including Great Prize (AEI 2012), Special Prize (IWIS 2012), Gold Medal with the Jury distinction, Gold Medal and diplomas in Teheran, medals and diplomas in Russia and Romania, Cup and Diploma of Poland's Minister of Science and Higher Education.

Monoionic silver with boron (Ag124) won prestigious awards, Crystal Ball and Gold Medal at Taipei International Invention Show & Technomart, Gold Medal with the Jury distinction at the International Warsaw Invention Show (2011), and also Gold Medals at fairs INTARG (Katowice, Poland), iENA (Nuremberg, Germany), Kunshan (China). It was also awarded Cup and Diploma of Poland's Minister of Science and Higher Education and numerous medals and diplomas in the Czech Republic, Romania, Russia, Iran, and those issued by different associations in Asia.

GOLDEN TOUCH

Line Golden Touch - the secret of youth

Skin regeneration is the most effective at night. We owe the magic of rebirth and renewal to hormones that begin to work in the evening. It stimulates cell division, protein production and purification of cells from toxins. It's also responsible for collagen renewal. Cosmetics with monoionic gold should be used under the eyes and face. These creams were created to work at night for beautiful skin every day.

Their use affects well to improve the condition and appearance of the skin. Thanks to its properties stimulate fibroblasts to produce collagen and elastin, shallow existing wrinkles and protect against the formation of new ones. Nourished skin is moisturised and regains its radiance.

Designed for:

- anti-ageing procedures,
- mature skin with visible signs of ageing,
- dry and dehydrated skin,
- vascular skin,
- skin in need of nourishment, supplement and mineralization.

Face and Body Spray with Monoionic Gold Au100

The spray locks moisture in the skin, regenerates and revitalizes the skin. The substance contained in the product – monoionic gold with 0.2 nm particle size – penetrates the deeper layers of the skin and stimulates the synthesis of collagen and elastin, making the skin firm, supple and young-looking.

The product may be applied alone as a spray to hydrate, refresh and invigorate the skin. It may also be used in tandem with the rejuvenating and lifting facial cream with monoionic gold or with the regenerating cream with organic silica and boron to strengthen their effects.

Active ingredients: Monoionic Gold

Size: 100 ml, 200 ml

Rejuvenating Night Cream with Monoionic Gold Au100

A cream with a rich texture and optimum contents of active ingredients, recommended for application every night. It effectively lubricates and hydrates the skin, reduces wrinkles and delays the ageing process. The cream leaves the skin conditioned, firm and elastic, improves the skin tone, reduces its susceptibility to discolouration, and protects against free radicals.

Active ingredients:

Monoionic Gold, Grape Seed Oil, Cocoa butter, Vitamin E, Vitamin C, Vitamin PP

Size: 30 ml

Rejuvenating Eye Cream with Monoionic Gold Au100

A rich-textured cream designed for the thin and delicate skin around the eyes. Visible effects include smoothed wrinkles, improved skin tightness and a luminous look of the skin around the eyes. The cream stimulates the skin surface cell renewal, moisturises, minimizes dark circles under the eyes, soothes and improves the lipid barrier of the epidermis.

Active ingredients:

Monoionic Gold, Grape Seed Oil, Cocoa Butter, Panthenol, Vitamin C, Vitamin PP

Size: 15 ml

Body Lotion with Monoionic Gold Au100

A body lotion with excellent nourishing, moisturising, regenerating and revitalizing properties for dry skin. The product is based on monoionic technology which increases the permeability of active substances through the skin.

It is recommended for irritated skin. The lotion soothes unpleasant skin sensations caused by dryness or sunbathing. It includes organic silica and monoionic gold which both mineralize epidermis and stimulate the synthesis of collagen and elastin.

Argan oil and cocoa butter smooth and moisturize and strengthen the epidermis. Vitamin PP soothes inflammation of the skin and reduces its roughness. Panthenol has a soothing effect by activating cell division epidermis and provides the skin with firmness and elasticity. The product's innovative composition enables direct application before getting dress and does not leave a sticky feeling.

Active ingredients:

Monoionic Gold, Organic Silicon, Panthenol, Argan Oil, Cocoa Butter, Vitamin E, Vitamin PP, Vitamin C

Size: 200 ml

Lavender Soap Bar with Monoionic Gold Au100

Body soap cleansing properties and refreshing the skin based on Greek olive oil with gold monoionic. In Greece, the Mediterranean climate favours the production of oil, which has a range of natural care properties – it is rich in vitamins, minerals, fatty acids and natural antioxidants. Appendix monoionic gold enhances nutritional properties.

Active ingredients: Monoionic Gold

Weight: 100 g

SILVER TOUCH

Line

The power of silver purity for healthy skin

Cosmetics belonged to the Silver Touch line with the monoionic silver exhibit strong antibacterial properties. Antibacterial Toner is indispensable in the fight against acne – regulates and reduces sebum production. It accelerates the elimination of acne and prevents the formation of new lesions on the skin. It also shortens healing time and recovery. In addition, it soothes, calms and refreshes the skin.

The products in this line can complement those in the Golden Touch and Organic Silica lines, as the active substances contained in them are compatible and synergetic.

Designed for:

- oily and mixed skin types, susceptible to lesions,
- problematic skin (acne, nonactive psoriasis),
- soothing irritation (i.e. before/after shave, depilation).

Antibacterial Toner with Monoionic Silver Ag123

With regular application, the product accelerates peeling away acne lesions owing to antibacterial properties. This perfect skin cleanser removes sebum and normalises the activity of the sebaceous glands. Allantoin contained in the product effectively soothes irritated skin. Suitable for delicate and sensitive skins.

Active ingredients:
Monoionic Silver, Allantoin

Size: 100 ml, 200 ml

Antibacterial Face and Body Spray with Monoionic Silver Ag124

A perfect purifying and mattifying face and body cleanser for skins with excessive sebum secretion. It cleanses and neutralizes the shine and prevents blackheads. The combination of monoionic silver with boron provides the lotion with strong antibacterial properties. It is recommended for oily skin with acne lesions. Ideal after shaving to prevent folliculitis from occurring in the form of spots.

Active ingredients:
Monoionic Silver, Organic Silica, Boron

Size: 100 ml, 200 ml

Antibacterial Spray with Monoionic Silver and Active Oxygen Ag125

The spray has a caring, soothing and regenerating effect on the skin prone to irritation. The product has a light, non-greasy consistency that facilitates quick absorption. Due to its antibacterial properties, it is recommended for skin prone to acne and seborrhoea. Silver and hydrogen peroxide cleanse the skin, soothe imperfections and accelerate skin regeneration. Based on the conducted research, it is concluded that Ag125 has antibacterial and mycostatic properties. The mist is caring support for the treatment of dysfunctional dermatological skin (skin with a tendency to psoriasis, atopy). The product is suitable for diabetic skincare. The mist can also support the care of skin prone to bedsores. The product has a light, non-greasy consistency that facilitates quick absorption.

Active ingredients: Monoionic Silver, Hydrogen Peroxide

Size: 100 ml, 200 ml

Monoionic Silver Bar Soap Ag

It is a natural soap with monoionic silver designed for daily skin care with antibacterial properties. It soothes irritation, cleanses and refreshes the skin, neutralizes the unpleasant smell of sweat.

Weight: 100 g

Vulcanic Monoionic Silver Bar Soap Ag

Body soap cleansing properties and refreshing the skin based on Greek olive oil with silver monoionic. In Greece, the Mediterranean climate favours the production of oil, which has a range of natural care properties – it is rich in vitamins, minerals, fatty acids and natural antioxidants.

Appendix monoionic silver enhances cleansing properties.

ORGANIC SILICA

Line Power of minerals as source of natural beauty

Monoionic silica and boron are the basic active ingredients in the Organic Silica cosmetics line. They have strong regenerating, soothing and moisturizing properties. These minerals play an extremely important role in collagen reconstruction and elastin production processes. Silicon is the building block of soft tissues and mucous membranes. It is responsible for the flexibility and youth of cells. The active substances of the Organic Silica cosmetics perfectly mineralize, support the binding of water in the epidermis, as well as remove toxic substances from cells, stimulating their renewal.

Designed for:

- normal and mixed skin,
- dehydrated skin,
- rough and dull skin,
- problematic, psoriatic, vascular and atopic skin,
- smoker's skin.

Regenerating Face and Body Gel with Organic Silica and Boron Silor+B

A gel that shows excellent regenerating and moisturizing properties. Soothes any kind of skin irritation. Ideal after invasive cosmetic treatments (micro-needle mesotherapy, exfoliation, microdermabrasion, etc.). The product soothes skin and shortens the time necessary to regenerate after exposure to the sun. Recommended for problematic skin (psoriatic, atopic, vascular, acne). Thanks to its consistency, the gel is good for all skin types.

Active ingredients:
Organic Silica, Boron, Allantoin

Size: 200 ml

Regenerating Foot Cream with Organic Silica and Boron Silor+B

A delicate cream for daily foot care. The product is based on monoionic technology which increases the permeability of active substances through the skin. It deeply softens, regenerates and renews the skin. It eliminates cornification of epidermis and problems with dry and cracked skin on the feet, as well as gives them a sense of lightness. The added organic silica takes part in the synthesis of collagen and elastin. Argan oil smooths, moisturises and reinforces the skin. Castor oil softens and regenerates the calloused epidermis. Linseed oil ester softens the skin, allowing active ingredients to penetrate deeper into the hypodermis. The light texture of the foot cream ensures its high absorption. It can also be used on other parts of the body with a hard epidermis, such as knees or elbows.

Active ingredients:
Organic Silica, Boron, Argan Oil, Castor Oil, Panthenol, Vitamin PP

Size: 100 ml

Body Lotion with Organic Silica Silor+B

A potent body lotion with excellent nourishing, moisturising and regenerating properties for dry and mixed skin. The product is based on monoionic technology which increases the permeability of active substances through the skin. It is recommended for irritated skin, as it soothes unpleasant skin sensations caused by dryness. The lotion includes organic silica which stimulates the synthesis of collagen and elastin. It is enriched with antioxidant green coffee oil which protects the skin and hypodermis against free radicals. The lotion leaves the skin softened and moisturized. Argan oil rehydrates and firms the skin. Vitamin PP soothes irritations and decreases skin roughness. Panthenol activates the division of epidermis cells and provides firmness and elasticity for the skin. The product innovative composition enables application directly before getting dressed and does not leave a sticky feeling.

Active ingredients:

Organic Silica, Panthenol, Cocoa Butter, Green Coffee Oil, Argan Oil, Vitamin E, Vitamin PP

Size: 200 ml

Active Regenerating Eye Cream

with Organic Silica Silor+B

A light cream designed to care for dry and sensitive skin around the eyes. The product is based on monoionic technology which increases the permeability of active substances through the skin. Silica monoions contained in cream regenerate and calm the skin. Grape seed oil moisturizes and improves skin tension around the eyes. Vitamin E is a natural antioxidant and protects against harmful external factors. Vitamin PP stimulates the production of collagen and is also a very strong antioxidant. It slows down the formation of free radicals and brightens the skin around the eyes. Included panthenol is a naturally soothing ingredient.

Active ingredients:

Organic Silica, Cocoa Butter, Grape Seed Oil, Vitamin E, Vitamin PP, Panthenol

Size: 15 ml

Anti-Wrinkle Nourishing Day Cream with Organic Silica and Copper Silor+B+Cu

Anti-wrinkle, nourishing day cream based on the innovative monoionic technology that increases the permeability of the active substance through the epidermis. Organic silica monoions take part in the biosynthesis of collagen and elastin as well as have regenerating and soothing properties. Copper is an element that naturally occurs in the body, it oxygenates skin cells and slows down the process of ageing. Vitamin E smooths skin and protects it from the negative effects of free radicals. Strong antioxidants included in cream: green coffee oil and argan oil nourish and improve skin elasticity. Panthenol has calming and soothing properties. Additionally, cocoa butter contained in cream ensures proper moisturizing and lubrication of the skin.

Active ingredients:

Organic Silica, Copper, Green Coffee Seeds, Argan Oil, Panthenol, Cocoa Butter, Vitamin E

Size: 30 ml

Anti-Wrinkle Nourishing Night Cream with Organic Silica and Copper Silor+B+Cu

A rich night cream that regenerates skin cells while you sleep. Organic silica contained in cream regenerates and stimulates the synthesis of collagen and elastin. Green coffee oil rich in phytosterols and tocopherols strengthens the lipid barrier of the skin and slows down transepidermal water loss. Argan oil nourishes and improves skin elasticity. Copper contained in cream has antioxidant activity. Vitamin E smoothens the skin and protects it from the negative effects of free radicals. Panthenol has calming and soothing properties. Additionally, cocoa butter contained in cream ensures proper moisturizing and lubrication of the skin.

Active ingredients:

Organic Silica, Copper, Green Coffee Seeds, Argan Oil, Panthenol, Cocoa Butter, Vitamin E

Size: 30 ml

Moisturising-Regenerating Day Cream **with Organ Silica and Hyaluronic Acid Silor+B+HA**

A light moisturizing day cream recommended especially for dry and sensitive skin. Based on the innovative monoionic technology that increases the permeability of the active substance through the epidermis. Organic silica monoions have regenerating and soothing properties. The cream is enriched with argan oil and hyaluronic acid which provide perfect moisturizing, softening and calming properties. Vitamin E protects from negative external factors as well as is a very effective antioxidant. Included panthenol is a naturally soothing skin ingredient.

Active ingredients:

Organic Silica, Hyaluronic Acid, Argan Oil, Cocoa Butter, Panthenol, Vitamin E

Size: 30 ml

Moisturising-Regenerating Night Cream **with Organ Silica and Hyaluronic Acid Silor+B+HA**

A rich night cream with strong nourishing and regenerating properties. Based on the innovative monoionic technology that increases the permeability of the active substance through the epidermis. Organic silica takes part in the biosynthesis of collagen and elastin as well as has regenerating and soothing properties. Argan oil and hyaluronic acid included in the cream moisturize, strengthen and smooth skin. Vitamin E nourishes the skin and protects it from the negative effects of free radicals. Vitamin B5 has soothing properties, it activates cells division and provides firmness and flexibility.

Active ingredients:

Organic Silica, Hyaluronic Acid, Cocoa Butter, Panthenol, Vitamin E

Size: 30 ml

Organic Silica and Hyaluronic Acid Spray Silor+HA

The mist refreshes, nourishes, firms and helps maintain proper hydration of the skin, providing protection against excessive moisture loss. The product accelerates the regeneration of irritated skin, especially after dermatological procedures, sun exposure and burns. It is recommended for the care of dry, acne and psoriatic skin. The spray soothes irritations and tightens the skin, providing immediate relief. The product has a light, non-greasy consistency that facilitates quick absorption.

Active ingredients:

Organic Silica, Hyaluronic Acid, Panthenol, Allantoin

Size: 100 ml, 200 ml

ORGANIC SILICA - complementary products

Regenerating Mouthwash with Organic Silica and Boron Silor+B

Silor+B mouthwash with organic silica has regenerative, painkilling and antibacterial properties. It prevents the formation of tartar, periodontal diseases, bleeding gums and other mouth diseases. Moreover, it soothes all irritations and regenerates gums. The product uses the regenerative power of silica and antibacterial properties of boron. Intended for everyday mouth care, especially in case of infection affecting the tissues and bones around the teeth. Eliminates gingivitis, stops bleeding. Cools and soothes oversensitive teeth. Helps prevent recurrent inflammations.

How to use:

Rinse your mouth twice a day with 15 ml of the mouthwash for a minute.

Size: 300 ml, 1000 ml

ORGANIC SILICA - SPORT LINE

A healthy lifestyle is growing in popularity. It is important to train regularly and to exercise with sufficient intensity to improve your fitness performance. Unfortunately, such actions increase acidification of the body and the risk of injuries and fractures. They also pose a threat to the cardiovascular system, especially in the case of competitive or professional sports. In the light of research, supplementing mineral deficiencies in the daily diet is a necessity.

Sport Line consists of products created specifically for active people – their formulas are based on active ingredients, such as silica, magnesium and silver. They strongly regenerate, strengthen, moisturise and protect. All of them are antibacterial.

Magnesium gel with Organic Silica Silor+Mg

Magnesium gel is designed for the entire body, especially recommended to sports and active people. The product is suitable for the rapid regeneration of the skin after exercise. Organic silicon has soothing and healing properties. Magnesium and organic sulphur included in the product regenerate the skin. Urea moisturizes the skin, vitamin B3 helps to reduce redness and irritation. Gel Silor+Mg soothes the skin irritated after a workout. Very well tolerated by sensitive skin.

Active ingredients:

Organic Silica, Magnesium, Organic Sulphur, Urea, Vitamin PP

Size: 200 ml

ORGANIC SILICA - SPORT LINE

Deacidifying -regenerating Bath Salt SiSALT

- alkaline pH – analogous to amniotic fluid, in which a foetus floats in the womb,
- bath pH between 8.2 – 8.5,
- based on mined salt, free from heavy metal pollution and toxins currently found in seas and oceans.

Microelements present in salt have a great influence on our bodies. By so-called osmosis, SiSALT bath detoxifies, purifies the organism. Moreover, it regenerates and supports the deacidification process, which improves the appearance and skin condition just after one usage!

How it works:

- mineralizes the organism,
- relaxes and regenerates the body,
- assists in treating various skin disorders such as acne, psoriasis, excessive sweating (hyperhidrosis),
- deacidifies the organism,
- ideal for treatments involving physical rehabilitation and post-trauma convalescence,
- softens the skin.

How to use SiSALT + Cu:

A **hypotonic solution** has a lower concentration than body fluids (salt concentration < 0.9%). This solution is used for eliminating toxins and waste products from the skin. Ideal for problems with acne, cellulite, excessive sweat and sebum production.

Deacidifying-regenerating Bath Salt with Copper SiSALT+Cu

Bath salts enriched with copper ions deacidify and regenerate the body. The addition of copper regulates the synthesis of collagen, shows antioxidant properties and can be used in anti-fungi and anti-bacterial prophylactics.

How to use:

To make a hypotonic solution add 200 g of salt per 100 litres of water (bath) or 20 g per 10 litres (soaking feet and hands).

A **hypertonic solution** has a higher concentration than body fluids (salt concentration > 0.9%), which enables the absorption of minerals contained in the bath salts. It also creates an alkaline solution similar in its properties to amniotic fluid (pH 8.5) and as a result deacidifies the body.

How to use:

To make a hypertonic solution add 1000 g of salt per 100 litres of water at the temperature of 32-38 degrees C. Have a bath once a week for a month, preferably in the evening, for 30-50 min.

Add 100 g of salt per 10 litres of water at the temperature of 32- 38 degrees C for soaking hands or feet. Repeat twice a week for a month.

Size: 1500 g

DIETARY SUPPLEMENTS - BIOCHELATS

Preparations that supplement zinc, copper, manganese, magnesium and chromium in the body:

- support deacidification of the body thanks to the alkaline pH 7.4 – 8.5,
- well-absorbed, liquid form,
- stable pH 1 – 8.5, so that their absorption is possible throughout the digestive tract.

Biochelate Zinc + Copper + Magnesium

A product aimed at increasing the dietary intake of zinc, copper and magnesium in our bodies. Zinc contained in the supplement helps protect cells against oxidative stress, as well as to maintain healthy hair, skin and nails. Copper helps in the proper functioning of the nervous system and the immune system, magnesium helps to reduce levels of fatigue and weariness.

How to use: 1 teaspoon (5 ml) a day mixed with 1/2 glass of water or juice. Do not use while fasting. Refrigerate after opening.

Recommended daily allowance (RDA): magnesium – 375 mg, zinc – 10 mg, copper 1 mg. Recommended daily dose (5 ml) contains: zinc 5 mg (50% RDA), copper 0.5 mg (50 % RDA), magnesium 57 mg (15.2% RDA)

Size: 150 ml

Biochelate Zinc + Copper + Chromium

A product aimed at increasing the dietary intake of zinc, copper and chromium in our bodies. Zinc helps in the proper functioning of the immune system, as well as in maintaining healthy bones, skin, hair and nails. Copper helps protect cells from oxidative stress and the proper functioning of the nervous system and the immune system. Chromium helps maintain normal blood glucose levels.

How to use: ½ teaspoon (2.5 ml) a day mixed with ½ glass of water or juice. Do not use while fasting. Refrigerate after opening.

Recommended daily allowance (RDA): cynk - 10 mg, miedź - 1 mg, chrom - 40 µg. Recommended daily dose (2.5 ml) contains: zinc 2.5 mg (25% RDA), copper 0.5 mg (50% RDA), chromium 25 µg (63% RDA)

Size: 150 ml

Biochelate Zinc + Manganese + Chromium

A product aimed at increasing the dietary intake of zinc, manganese and chromium in our bodies. Zinc helps in the proper functioning of the immune system, as well as in maintaining healthy bones, skin, hair and nails. Manganese contributes to the maintenance of healthy bones and helps in the proper formation of connective tissue. Chromium helps maintain normal blood glucose levels.

How to use: ½ teaspoon (2,5 ml) a day mixed with ½ glass of water or juice. Do not use while fasting. Refrigerate after opening.

Recommended daily allowance (RDA): zinc – 10 mg, manganese – 2 mg, chromium - 40 µg. Recommended daily dose (2.5 ml) contains: zinc – 2.5 mg (25% RDA), manganese – 2 mg (100% RDA), chromium - 25 µg (63% RDA)

Size: 150 ml

DIETARY SUPPLEMENTS in the most digestible form

Meet our **SILOR ORGANIC 1000** dietary supplements based on innovative monoionic technology.

SILOR ORGANIC 1000 products do not contain:

- anti-caking agents,
- bulking or absorbing agents,
- viscosity enhancing agents,
- sweeteners,
- flavours,
- fragrances.

Dietary supplement **SILOR ORGANIC 1000** Silica

A dietary supplement aimed at increasing the dietary intake of silica in the body.

Recommended daily dose:

15 mg of inorganic silica (Si), 10 mg of organic silica (Si)

1 ml of the product contains: 0.6 mg of inorganic silica (Si), 0.4mg of organic silica (Si)

How to use:

25 ml (measuring cup) once a day. The recommended amount should be mixed with glass of fruit juice, vegetable juice or water. Drink the prepared solution. It is not recommended to consume the preparation without dilution.

Size: 500 ml, 1000 ml

DIETARY SUPPLEMENTS in the most digestible form

Dietary supplement

SILOR+B ORGANIC 1000 Silica with boron

A dietary supplement aimed at increasing the dietary intake of silica and boron in the body.

Recommended daily dose (25 ml) contains:

15 mg of inorganic silica (Si), 10 mg of organic silica (Si), 2.5 mg of boron (B)

1 ml of the product contains: 0.6 mg of inorganic silica (Si), 0.4 mg of organic silica (Si), 0.1 mg of boron (B)

How to use:

25 ml (measuring cup) once a day. The recommended amount should be mixed with glass of fruit juice, vegetable juice or water. Drink the prepared solution. It is not recommended to consume the preparation without dilution.

Size: 500 ml, 1000 ml

Dietary supplement

SILOR+B+J ORGANIC 1000 Silica with boron and iodine

A dietary supplement aimed at increasing the dietary intake of silica, boron and iodine in the body.

Iodine (J) present in the SILOR+B+J ORGANIC 1000 products:

- helps maintain normal cognitive functions,
- helps maintain normal energy metabolism,
- helps in the proper functioning of the nervous system,
- helps maintain healthy skin,
- helps in the proper production of thyroid hormones and the proper functioning of the thyroid gland.

Recommended daily dose (25 ml) contains:

15 mg of inorganic silica (Si), 10 mg of organic silica (Si), 2.5 mg of boron (B).

1 ml of the product contains: 0.6 mg of inorganic silica (Si), 0.4 mg of organic silica (Si), 0.1 mg of boron (B), 4 µg of iodine (J)

How to use:

25 ml (measuring cup) once a day. The recommended amount should be mixed with glass of fruit juice, vegetable juice or water. Drink the prepared solution. It is not recommended to consume the preparation without dilution.

Size: 500 ml, 1000 ml

MITOCHONDRIAL MT SERIES

Mitochondrial Mt Series

A series of dietary supplements containing mitochondrial substances, which are designed to support the proper functions of the mitochondria in the cells of the body.

Mitochondria

are one of the most important organelles in human cells – they are a source of chemical energy for the entire cell. It is our mini „power station” – form a basic “fuel” chemical compound in the form of ATP, which is used to “feed” the most energy metabolic processes in the body:

- in addition to producing energy, mitochondria play a key role in initiating programmed cell death (apoptosis). This is how our body destroys cancer cells and fights certain infections,
- mitochondria support repair processes in the cell and the production of sex hormones.

The normal activity of many tissues, organs and systems depends on the amount of energy supplied to them. Mitochondria are the main supplier of energy, as long as there are **mitochondrial substances** in the system.

Dietary supplement Selenium + Vitamin B₁₂

A product aimed at increasing the dietary intake of selenium and vitamin B₁₂ in our bodies. The concentration of **selenium** in the body helps protect the cells from oxidative stress and strengthens the immune system. **Vitamin B₁₂** contributes to the normal functioning of the nervous system, minimising feelings of tiredness and exhaustion, production of red cells and maintenance of psychological functions.

How to use: 5 ml (measuring cup) a day mixed with 1/2 glass of water or juice. Drink prepared solution. Should be taken after meal.

Recommended daily dose (5 ml) contains: Selenium 55 µg, Vitamin B₁₂ 2,5 µg

Dietary Reference Values (DRVs): Selenium 55 µg (100% DRVs), Vitamin B₁₂ 2.5 µg (100% DRVs)

Size: 300 ml

MITOCHONDRIAL MT SERIES

Biochelate Mt Zinc + Manganese + Magnesium

Biochelate Zn + Mn + Mg is a product aimed at increasing the dietary intake of zinc, manganese and magnesium in the body. The presence of **zinc** and **manganese** in mitochondrial therapy is extremely important, as they protect the cells from oxidative stress. **Magnesium** helps maintain normal energy metabolism.

How to use: 10 ml (measuring cup) a day mixed with 1/2 glass of water or juice. Drink the prepared solution. Should be taken after a meal.

Dietary Reference Values (DRVs): Zinc 10 mg, Manganese 2 mg, Magnesium 375 mg

Recommended daily dose (10 ml) contains: Zinc 5 mg (50% DRVs), Manganese 2 mg (100% DRVs), Magnesium 114 mg (30.4% DRVs)

Size: 300 ml

Dietary supplement Vitamin C + Potassium + Magnesium + Glutathione

A product aimed at increasing dietary intake of vitamin C, magnesium, potassium, and reduced glutathione in the body. **Vitamin C** maintains normal energy metabolism, contributes to the production of collagen, strengthens nervous and immune systems. **Magnesium** reduces tiredness and fatigue, controls the functioning of the immune system and muscles, maintains normal energy metabolism. **Potassium** controls the blood pressure, muscles and nervous system. Reduced **glutathione** is one of the most important antioxidants in the body.

How to use: 1 teaspoon (5g) per day. Mix the recommended amount with 1/2 cup of warm water. Drink the prepared solution.

Dietary Reference Values (DRVs): Vitamin C 80 mg, Magnesium 375 mg, Potassium 2000 mg.

The recommended daily dose of the product (5g) contains: vitamin C 500 mg (625% DRVs), magnesium 300 mg (80% DRVs), potassium 400 mg (20% DRVs), glutathione 250 mg*.

*no data specifying the Reference Intake Values (DRVs)

Size: 150 g, 450 g

DIETARY SUPPLEMENTS in the most digestible form

How to use:

5 ml (measuring cup) once a day. The product can be consumed on its own or added to soups, vegetable and fruit juices and salads.

Recommended daily dose of the product (5 ml) contains:

2000 IU (50 µg) of vitamin D₃ (1000% RDA), 2.5 g Omega-3 (α-linolenic acid)*, 0.66 g Omega-6 (linoleic acid) *, 0.04 g Omega-7 (vaccenic acid)*, 0.74 g Omega-9 (oleic acid)*

*no data specifying the Reference Intake Values (DRVs)

Size: 300 ml

Health-promoting properties of omega-3 fatty acids have been known and used all over the world for many years. One of the indicators of the health quality of a diet is the level of consumption of omega-3 fatty acids and its proportion to omega-6 fatty acids. Unfortunately, this proportion in an average diet is far from desirable due to an excessively high intake of omega-6 fatty acids and fats containing saturated fatty acids. This imbalance has a negative effect on the lipid profile.

Dietary supplement Vitamin D₃ + Omega-3

Dietary supplement Vitamin D₃ + Omega-3

A preparation aimed at supplementing vitamin D₃ in the diet and increasing the dietary intake of essential unsaturated fatty acids (EFAs) Omega 3 + 6 + 7 + 9.

The preparation contains a concentrated dose of Omega 3,6,7,9 fatty acids in the form of monoparticles (ethyl esters) isolated from linseed oil. The advantage of fatty acids' ethyl esters over traditional triglycerides lies mainly in their simple chemical structure and faster release of free omega-3,-6,-7,-9 fatty acids, thanks to which the supplement is characterised by:

- absorption at a cellular level,
- faster digestion process,
- high bioavailability in the human body.

Vitamin D:

- supports the proper functioning of the immune system,
- helps maintain healthy teeth,
- helps maintain healthy bones,
- supports the proper functioning of muscles,
- participates in the process of cell division,
- participates in the process of cell division,
- helps maintain the proper level of calcium in the blood.

Omega-3 (alpha-linolenic acid in an ethyl ester form):

- helps maintain the proper level of cholesterol in the blood (a beneficial effect occurs when consuming 2g of ALA daily).

Active ingredients:

Silica (Si)

- involves in the collagen synthesis, enabling skin flexibility,
- regenerating, moisturizing, soothing,
- has a positive effect on hair and nails,
- prevents osteoporosis and osteoarthritis,
- improves the state of the connective tissue and the bone tissue,
- strengthens blood vessels by improving their flexibility,
- prevents cholesterol build-up,
- strengthens the immune system,
- removes toxic substances from cells.

Boron (B)

- microelement essential for the proper calcium management in the body,
- antiseptic, antiviral and antibacterial properties,
- synergy with silica to strengthen its effect,
- stimulates the formation of vitamin D₉.

Zinc (Zn)

- protects cells from oxidative stress,
- strengthens the immune system,
- involves in the metabolism of macronutrients, carbohydrates, fatty acids, vitamin A,
- maintains the acid-base balance,
- enables the correct synthesis of DNA and proteins,
- maintains normal reproductive functions and fertility,
- has a positive effect on bones, skin, hair and nails,
- maintains a normal level of cholesterol in the blood.

Copper (Cu)

- improves the state of the connective tissue,
- controls the functioning of the nervous system and the immune system,
- maintains normal energy metabolism,
- transports iron,
- has a positive effect on the pigmentation of skin and hair,
- protects cells from oxidative stress.

Magnesium (Mg)

- maintains normal energy metabolism,
- reduces feelings of tiredness and exhaustion,
- maintains electrolyte balance,
- controls the functioning of the nervous system,
- controls the functioning of muscles,

- maintains proper psychological functioning,
- strengthens bones and teeth,
- contributes to the fission,
- synthesises proteins.

Manganese (Mn)

- protects cells from oxidative stress,
- maintains normal energy metabolism,
- strengthens bones,
- manufactures connective tissues.

Chromium (Cr)

- involves in the metabolism of macronutrients,
- maintains a proper level of glucose in the blood.

Iodine (J)

- maintains proper cognitive functions,
- maintains normal energy metabolism,
- strengthens bones,
- manufactures connective tissues.

Selenium (Se)

- protects cells from oxidative stress,
- controls the functioning of the immune system,
- maintains proper thyroid functioning,
- protects the process of spermatogenesis,
- maintains normal blood pressure.

Potassium (K)

- maintains proper functioning of the nervous system,
- maintains proper functioning of muscles,
- maintains normal blood pressure.

Vitamin C:

- maintains normal energy metabolism,
- controls the functioning of the nervous system,
- controls the functioning of the immune system,
- protects cells from oxidative stress,
- reduces feelings of tiredness and exhaustion,
- maintains proper psychological functioning,
- strengthens immune system during and after a workout,
- produces collagen, which strengthens: blood vessels, bones, cartilage, gingiva, skin and teeth.

Vitamin B₁₂

- maintains normal energy metabolism,
- reduces the feeling of tiredness and exhaustion,
- produces red cells,
- maintains normal homocysteine metabolism,
- controls the functioning of the nervous system,
- controls the functioning of the immune system,
- maintains proper psychological functioning,
- contributes to the fission.

Vitamin D

- supports the proper functioning of the immune system,
- helps maintain healthy teeth,
- helps maintain healthy bones,
- supports the proper functioning of muscles,
- participates in the process of cell division,
- has a positive effect on the absorption of calcium and phosphorus.

Glutathione reduced (GSH)

- a strong natural antioxidant,
- present in every cell protects them from oxidative stress caused by free radicals.

Omega-3

- maintains a normal level of cholesterol in the blood (a beneficial effect occurs when consuming 2 g of ALA daily).

Gold (Au)

- one of the ultramicroelements of the body,
- antibacterial,
- improves collagen synthesis and tissue reconstruction,
- defers wrinkles,
- defers melanin manufacturing, preventing discolouration,
- eliminates free radicals,
- reduces damage caused by ultraviolet radiation,
- natural conservative.

Silver (Ag)

- antiseptic, antiviral and antibacterial,
- soothing and anti-inflammatory,
- kills most bacteria causing skin inflammation (folliculitis, acne vulgaris, etc.),
- stimulates cell regeneration process,
- protects skin from harmful thermal, biochemical and external factors (wind, dust, frost),
- improves the functioning of sebaceous glands,
- regulates sebum extraction by maintaining the balance in too dry or too oily skin,
- ensures the proper level of epidermis moisturisation,

- an effective active ingredient in acne treatment, before and after shave, and depilation,
- natural conservative.

Organic sulphur (MSM)

- stimulates the synthesis of proteins (collagen, elastin, keratin, amino acids, enzymes, immunoglobulins, glutathione) in the skin,
- antioxidant, eliminates free radicals,
- strengthens and elasticises skin, blood vessels, hair, and nails,
- strengthens skin's immunity,
- antiallergic and soothing,
- elasticises the skin, reduces scars and wrinkles.

Active oxygen (hydrogen peroxide H₂O₂)

- antiseptic and antibacterial,
- soothing,
- a signaling molecule and a messenger that provides information about damage and stimulates effector cells to respond,
- promotes the secretion of cytokines that support cell regeneration.

Urea

- moisturising substance, able to penetrate through corneum,
- keratoplasty (mellows corneum) by stimulating epidermis' restoration.

Vitamin E

- natural antioxidant,
- reduces symptoms of photoaging, wrinkles and skin decolourisation.

Vitamin PP

- improves skin colouration – decreases yellowing of the skin and brightens pigment discolouration,
- smoothens wrinkles.

Grape seed oil

- tonifying and soothing,
- seals the walls of blood vessels and makes them more flexible,
- source of linoleic acid and vitamin E,
- regenerates and nourishes the skin.

Argan oil

- anti-ageing, smoothens wrinkles, prevents the creation of new ones,
- smoothens and moisturises the skin,
- neutralises free radicals

Green coffee oil

- natural source of phytosterols and tocopherols,
- keeps the moisture inside the skin,
- natural antioxidant.

Cocoa butter

- moisturising,
- lubricating,
- protecting.

Hyaluronic acid

- a natural ingredient of the skin,
- bonds and keeps water in the skin,
- smoothens and elasticises the skin,
- smoothens wrinkles.

Allantoin

- nonallergic skin regenerator,
- accelerates healing,
- soothing and mellowing.

Panthenol

- keeps water,
- moisturising,
- soothing,
- accelerates healing of the epidermis and reduces damage caused by ultraviolet radiation,
- stimulates growth and cell regeneration.
