Our ramen generally do contain meat (pork and chicken) egg, soy, wheat, seafood (crustacean and mollusc) ingredients. We will endeavour to meet your requests but in certain situations we may not be able to oblige.

Gluten Intolerant Customers. All ramen can be served with bean vermicelli or low carb konnyaku noodles instead of our homemade wheat egg noodles to make a low gluten alternative but will be cooked in the same pot as normal noodles and contain soy sauce containing wheat. Please be advised due to limitations in our small kitchen we will not be able to guarantee gluten free due to traces of cross contact.
