8. EXPOSURE CONTROLS / PERSONAL PROTECTION

No Value is assigned for this material by the National Health and Safety Commission

TWA – Not Applicable
STEL –
Carcinogen
Category –
Notices –

TWA is the time-weighted average airborne concentration over an eight-hour working day, for a five-day working week over an entire working life. STEL is the short-term exposure limits and are specified for short periods of exposure such as 15 minutes. According to current knowledge this concentration should neither impair the health nor cause undue discomfort to the majority of workers.

Biological Limit Values:

No Biological limit has been assigned

These Exposure Standards are guides to be used in the control of occupational health hazards. All atmospheric contamination should be kept to as low a level as is workable. These exposure standards should not be used as fine dividing lines between safe and dangerous concentrations of chemicals. They are not a measure of relative toxicity.
