

SUPER HI-BRIGHT SERIES

HB

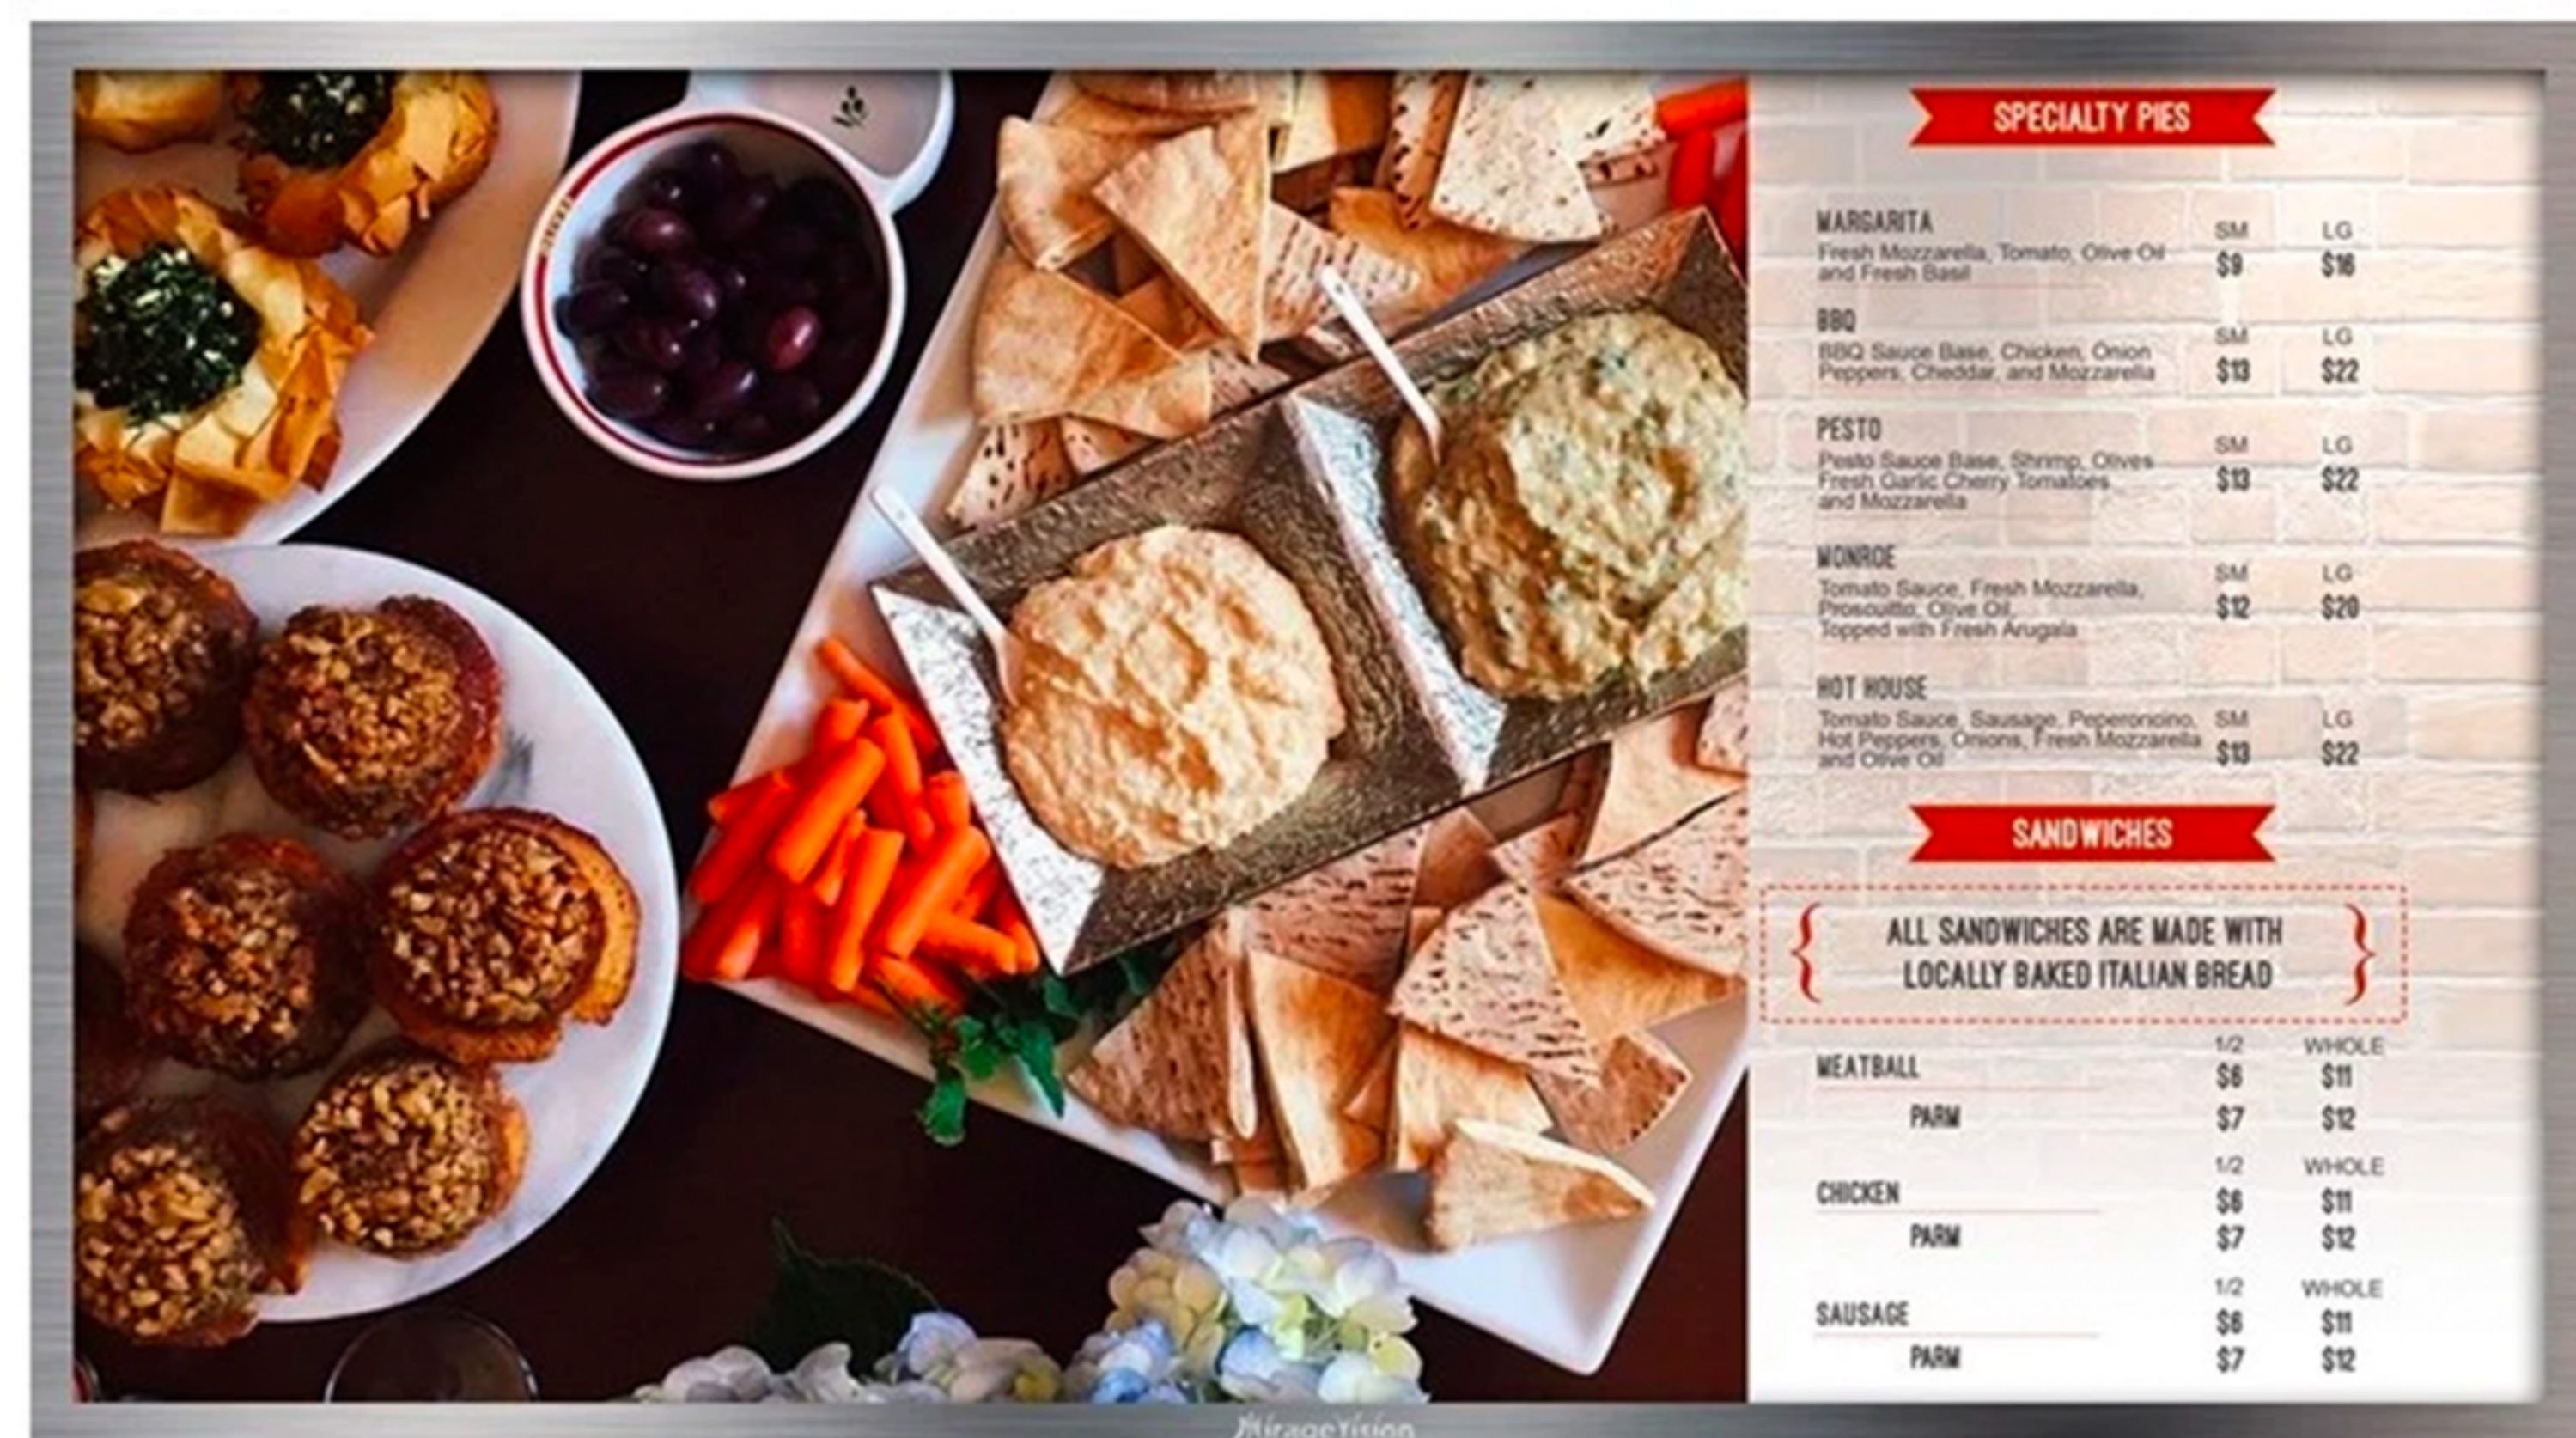

Our MirageVision High Bright-V models are designed for high-end commercial and residential application, whereas direct sunlight application is an issue. These models are equipped with Mega Hi-Brightness (up to 3000 NIT) Using Vizio's newest QDOT Technology. There is very little picture degradation when used in full bright daytime sunlight. For the customer who expects the same picture quality in full sunlight when compared to any top of the line indoor TV/display unit.
