The power of Fontus automation.

Making waves in liquid handling.

Automated sample preparation does not have to be complicated. Release the power of the Fontus™ next-generation automated liquid handling workstation and transform your sample preparation.

Find your flow with Fontus automation:

- **Save time, improve efficiency and productivity** with our easiest to use and most capable workstation
- **Get up and running faster than ever before** with standard configurations, options, peripherals and customizable solutions
- **Safeguard projects** with reliable automation and support that will not let you down
- **Customizable to fit your needs**, now and in the future

Discover the power of *simplicity*, the power of *reliability* and the power of *support*.

8 Tip Varispan for tube to plate reformatting

96/384 main array pipettor and labware gripper

Flexible deck arrangement

The power of *simplici*y.

With the Fontus workstation, sample preparation has never been easier. With a flexible design that supports both span-8 as well as 96/384 array pipetting, user-friendly software and reformatting capabilities help you breeze through sample prep assays in a timely manner. Choose from up to 8, 96 or 384 sample pipetting options to suit your needs—all optimized for accurate pipetting.

The power of *reliabili*y.

Built on the strong foundations of our trusted Sciclone® and Zephyr® technologies, the Fontus workstation takes automated sample prep to the next level with a robust system with expanded capabilities that just keeps on performing. Make downtime a thing of the past with our 35 years' industry experience and watertight collaborations with leading peripheral suppliers.

The power of *support*.

With Revvity, you have a powerful, reliable automation team behind you, dedicated to getting you up and running and helping to develop your workflows so you can breathe easy.

The Fontus Liquid Handler seamlessly integrates into Revvity explorer™ Automation Systems with its improved robotic access. Revvity can offer full robotic integrated systems for a wide range of assays.

**Release the power of
Fontus automation in
your workflows.**
