2. Ways Solving

- Ways simply means the number of possible “ways” a winning combination can be achieved.
- There are 234 possible ways to win. (5 columns of 3 symbols) ($3 \times 3 \times 3 \times 3 \times 3 = 234$)
- In a Ways solving game, the goal is to match symbols consecutively across columns from left to right
- Every possible left-to-right combination regardless of where the symbol lands on the column can be a win

Example: This is a win worth \$2.00

According to the payable, the Flour symbol is worth the following:

	x5	\$5.00
	x4	\$3.00
	x3	\$1.00

In the example, from left to right, the Flour symbol won in 2 ways for \$2.00

Ways solving works by reading left to right, a symbol in the consecutive column will count towards that “payline”.

In the above example, the first “payline” or Way are the three symbols with the red box. The second “payline” or Way are the three symbols with the orange box.

Both Ways are worth \$1.00 which equals to the \$2.00 total win.

3. Donut Rounds

- Reveal 6 Golden Donuts on a single ticket to activate the donut rounds feature
- A half dozen rounds are awarded
- During the feature, each symbol space where a Golden Donut lands will gain a frame on that symbol spot.
- There are three tiers - Green, Blue, Gold. Landing a Golden Donut in one of these frames increases the tier of the frame.
- After the last round, all framed spots will be replaced with a donut box
- The higher the tier of the donut box, the bigger the prizes.
- Landing 3 or more Golden Donuts awards an additional round
- If a Golden Donut lands inside the third tier frame, an instant win is awarded.
- Prizes include instant wins or the Minor, Major or Grand prizes.
