

USER MANUAL

SDG TELLIS DROPPER POST

Congratulations on the purchase of your new SDG Tellis dropper seat post! The Tellis dropper post is designed to offer quick seat height adjustments while on the fly. Please be sure to carefully read the following instruction manual, as failure to properly install the seat post can cause failure resulting in serious injury or death. If you have any questions on how to install your Tellis post, please visit your nearest authorized retailer or contact SDG Components directly.

INSTALLATION

Tools Required

- 2/3/5mm Hex Wrenches
- Masking Tape
- Torque Wrench
- Grease or Carbon Paste (depends on frame)

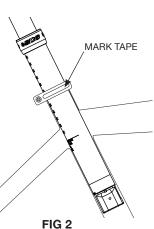

Installing the lever

- 1. Remove M4 clamp bolt from remote so it opens freely.
- 2. Place lever on left-hand side of the handlebar. Position to what feels comfortable and re-install the M4 clamp bolt.

Installation of the cable & housing

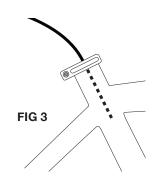

- 1. Insert the seat post into the bike to deterdepth of the seat post. You must install a sadpoint in order to determine saddle height.
- 2. Mark the seat post tube (FIG 2) with masking tape at the seat post binder and remove the seat post. (Do not remove the tape as it will be used to install the cable at the end)
- 3. Measure from tape to bottom of the seat post and write down measurement for use later in installation process.
- 4. Route the housing to the lever and install the housing into the barrel adjuster (with end cap installed) to determine length of the housing needed. Rotate the bars to ensure the cable is long enough, does not bind, does not stretch and does not interfere with other cables or parts.
- 5. Put a piece of tape on the housing to mark the spot where it sticks out of the seat tube. (FIG 3)
- 6. Feed housing up through the seat tube enough so that you can cut the housing from the tape on housing down.

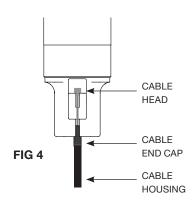

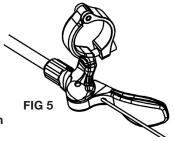

- 7. Install end cap to cable housing at seat post end.
- 8. Secure the inner cable head into the actuator coupler and insert cable into the seat post end of the housing. (FIG 4)
- 9. Install the housing into the housing stop. (FIG 4)
- 10. Insert the seat post into the frame down to the tape while simultaneously pulling on the cable and housing from the opposite end.
- 11. Install the inner cable and cable housing thru the barrel adjuster on the lever so the inner cable comes out the back side (FIG 5).
- 12. Remove all slack in the cables before tightening the cable anchor screw to 1.2Nm (10 lbs-in). Trim any excess inner cable and install cable end cap to cut end of cable.
- 13. Press the lever to stretch the cable and confirm cable housing is seated properly. Remove additional slack by unscrewing the barrel adjuster until play in lever is gone.

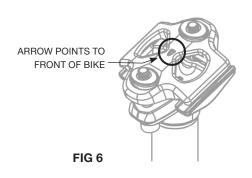

Minimum Insertion Point 100mm
Saddle Rail Compatibility 7x7 mm & 7x9 mm

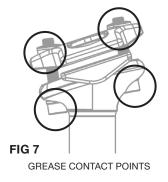

Service videos are available on sdgcomponents.com

MAINTANENCE

- After Every Ride: Clean dirt and debris away from post and specifically ensure seal is clear of any dirt, mud or debris.
- Every 120 Hours Of Ride Time: Loosen collar to clean old grease and apply a liberal application of new suspension specific grease underneath the collar. Tighten collar back down and cycle post 5-10 times to spread grease.
- Every 400+ Hours: Inspect internals for wear items and replace as needed. Please visit www.sdgcomponents.com for disassembly instructions.

WARRANTY

- SDG Limited Two (2) Year Warranty on Tellis Dropper Seat Post
- Subject to limitations, SDG warrants, to the original owner (non-transferable), that the Tellis post be free from defects in materials and workmanship. This limited warranty expires two (2) year from the date the original SDG post was purchased from an authorized dealer or from an authorized Original Equipment Manufacturer. (Receipt required to validate)

Terms of Warranty

- Shall this product fail under normal conditions, while properly maintained per the maintenance schedule, SDG or an authorized agent, at their sole and final discretion, will repair, replace and or service.
- This limited warranty does not apply to normal wear and tear, malfunctions that resulted from improper assembly, failure to follow maintenance, alteration, crash, or any other improper or excessive use.
- Contact SDG COMPONENTS for ANY warranty questions.

PLEASE READ!

- If you have any questions or are unclear on any steps of the install process, please either contact SDG directly or your local bike shop to ensure correct installation. Failure to do so can cause the post to malfunction causing serious injury or death.
- Follow installation instructions closely. Failure to do so can result in post malfunction causing serious injury or death.
- Ensure post is inserted to at least the minimum insertion line. If minimum insertion line is exposed it can cause the post and / or frame to fail.
- Following any crash, please have a certified mechanic inspect your post and bike for damage to ensure the post is still safe to ride.
- · Always wear a helmet and ride within your limits.
