GABRIEL SCOTT

EST. 2012

### Provided supplies

- Luna Pendant fixture
- Hanging template
- Male monopoints
- Universal T-bar
- Installation screws

### Required tools and hardware

- Screwdriver
- Drywall anchors suitable for 25lbs for mono points
- 4x 2-pole wiring terminals, screws or screwless, 12-18AWG (1.0-2.5mm<sup>2</sup>) rated for 600V, 15A / ex: WAGO 222-412
- LED driver; Input: local line voltage, output 24Vdc SELV, 5A, max 60 watt class 2 LED driver

### STEP 1

If the fixture is provided with stems to assemble, put together the stems using the provided self locking nipples (1/8IPS) and leave to set for 24 hours. Do not unscrew the stems once assembled. This curing step can be done while the chandelier is installed.

### STEP 2

Carefully slide the glass beads over the Luna tubes.

### STEP 3

Place the canopy over the threaded nipple and secure it in place with the provided nut.

### STEP 4

Using wire terminals, connect the LED driver to the Luna Fixture (Maximum distance 100'; use 12-18AWG (1.0-2.5mm<sup>2</sup>)). On Gabriel Scott fixtures, the black wire (+) is positive, and the white wire is the negative (-). Next, again using wire terminals, connect the LED driver to the power supply. Finally, attach the universal T-bar and screw the canopy with the provided screws.
