

## **Select Juice, LLC Achieves SQF-Certification (Safe Quality Food)**

*Lancaster, Pennsylvania — May 31, 2023* — Select Juice, LLC known for its premium flavor-forward 100% fruit and vegetable juices, announces that the company has achieved certification under the prestigious Safe Quality Food (SQF) Safety Code Edition 9 for Food Manufacturing.

The SQF Program is administered by the Food Marketing Institute (FMI) in the United States and is benchmarked to the Global Food Safety Initiative (GFSI), a global collection of standards and requirements for food companies to practice food safety management at the same high-quality standards around the world.

"Attainment of this certification was the natural next step in the company's growth and gives customers confidence that our products meet the highest possible food safety standards," says Kyle Ober, Chief Operating Officer. "The third-party validation and certification itself are a wonderful accomplishment, but the real achievement is that we have a sound, tested food safety program that protects our company and our customers."
