

New Zealand grown dual purpose US Cultivar with citrus, grapefruit, and lime characters.

Applications

Typically employed in “new world” style pale ales, creative brewers are using it for very intense summer ales where its fruit-forward aroma and oils profile make for a refreshing finish.

Breeding

Taiheke® Brand USDA 56013 originates from an early US breeding program circa 1956 and was the first commercially bred hop to emerge from the USDA-ARS program when released in 1972 as Cascade. It was bred from crossing an English Fuggle with a male selection believed to have been a crossing of Fuggle with the Russian variety Serebrianka.

Brewing

Performs well when used as a single variety across multiple kettle additions or when singled out as a late gift or dry hopping duty. Can do some really great things for the hop advocate when matched up with some of the other New Zealand aroma heavy weights such as Motueka or Riwaka.

Tech Specs

Alpha Acids	6-8%
Beta Acids	5-6%
Total Oil	0.8-1.3 mL/100g
B-Pinene	0.5-0.7%
Myrcene	50-55%
Linalool	0.4-0.6%
Caryophyllene	5-7.5%
Farnesene	5.8%
Humulene	12-18%
Geraniol	1-1.4%
