CHOOSING YOUR SETTINGS

1. Click the SETTINGS tab on the home screen.

2. To change the display size on your screen click the DISPLAY tab and then click the DISPLAY POSITION link.

3. To set the correct date and time click on the OTHER tab after clicking SETTINGS. Click the MORE SETTINGS link and scroll down to DATE AND TIME. Select the AUTOMATIC DATE AND TIME and choose your time zone.

4. To return to the main menu click the HOME button on your remote (the button with the picture of the home) or right click if you are using a wireless mouse.

5. To test your Internet connection, click on the MY APPS tab on the home screen and choose the SPEED TEST app.

Recommendations from the Skystream X Team:

▢ We recommend that you use a wireless keyboard/mouse – this allows for an easier browsing experience.

▢ DO NOT every try to update the box on your own. Do not click the SYSTEM UPDATE button in SETTINGS or try to uninstall apps. Do not install any Wizards or Xunity. We recommend that you contact us prior to trying any of these options.

▢ Apps like Showbox (Eyeball icon on home screen) and XBMC (X icon on the home screen) are not run by Skystream and therefore we are not able to control the frequency or length of downtime you may experience if any.

▢ Like our Facebook page and check back often for updates on Apps and Add-ons. We often post instructions on how to make your viewing experience the easiest and most enjoyable. Please leave us a product review on our website or on Amazon. If you feel that you have had less than a five-star experience please contact us at 1-888-963-9105 so we may address and fix any issues for you.
