

FOOD & BEVERAGE

Liquidyne has decades of experience in food processing, dairy, brewery and wine operations. We are dedicated to helping growing companies keep their fluid transfer process clean, modern, efficient and running smoothly.

Whether you need to optimize your process flow, improve purity standards, find hard-to-get products, or plan a modern, efficient design to grow your operations, our liquid handling experts are available to guide you.

OUR COMMITMENT TO YOU

Liquidyne is a high-purity, fluid handling and measurement company dedicated to helping growing companies keep their fluid transfer process clean, modern, efficient and running smoothly.

We specialize in providing everything from high-quality single-use components, including tubing, connectors, valves and pumps – to full service design of complex, high-purity systems.

Our reputation for quick, responsive and knowledgeable service, means you can count on us to provide intelligently engineered solutions for all of your fluid handling needs.

QUALITY

Liquidyne provides only the highest quality, certified products and solutions which put the user's needs and plant safety first. Our in-house fabrication, testing facility and ISO certified clean room mean we can deliver quality custom solutions in less time.

INTEGRITY

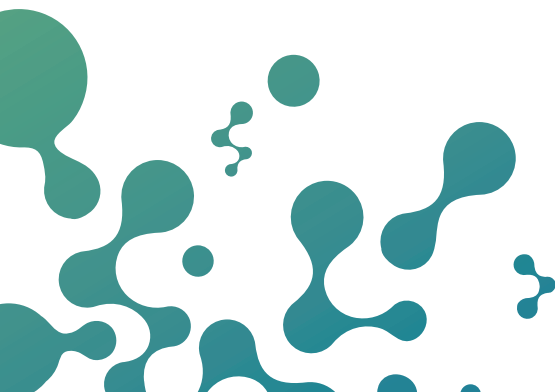

Every fluid handling need is different. We focus on your unique requirements to provide lower cost of ownership, consistent results and increased productivity every time.

EXPERTISE

You can count on us to provide intelligently engineered solutions for all of your fluid handling needs. We combine our technical expertise, in-house fabrication capabilities and partnerships with industry-leading manufacturers to deliver customer-driven solutions.

RESPONSIVENESS

The biotech and food and beverage moves fast. Fortunately, so do we. Our team is always here to answer any questions and we maintain inventory in our warehouse to provide quick turns on standard and customer-specific products. Our on time delivery guarantee means you'll have the right product on time, every time.

OUR BUSINESS PARTNERS

CONTACT

DAVE COUPER

BUSINESS DEVELOPMENT DIRECTOR

Dave Couper manages the business development activities at Liquidyne. He is also responsible for the quality management oversight of the Design Group for Single-Use and in-house fabrication for new product development and document systems. As a Liquidyne's ISO9001:2015 Quality Management Systems team member, Dave guides within each area of Liquidyne's business. At Liquidyne, Dave has developed several startup companies providing operational, financial, and product development leadership, taking several companies globally. It is this drive that he shares to support the work of Liquidyne's customers.

At Liquidyne, we prioritize our commitment to quality and consistency. In 2017 we achieved ISO 9001:2015 Quality Management System certification to ensure we can repeatedly deliver consistently high-quality products and solutions. Being as ISO 9001 facility, together with our USP Class IV Testing, ASME Bioprocessing Equipment (BPE), and EHEDG certification guarantee, we have the methodologies to assure quality. We will quickly and accurately rectify any issues if any of our products are ever in non-conformance.
