

# coleherbals

## *Affiliate News*

Occasionally, I will send you some easy marketing tips to get you started selling [coleherbals](#) products. This week, we will show you the quickest ways to get started.

### **Facebook and Instagram Posts**

One of the fastest ways to earn money is through consistent social media posts. Our current images are best for Instagram and Facebook.

To access the images and captions for Facebook and Instagram, please click here: [Dr. Cole's Herbal Remedies](#). You may share these posts or download the photos, copy the posts, and use your own referral links and coupon codes.

To find your coupon code, please go to [coleherbals affiliate portal](#) then click on "Home." You may change the coupon code by clicking on "Change Coupon Code" and then pressing "save" when you are done. If you currently are promoting a coupon code, it would be best not to change it.

Your referral link is also found on the "Home" tab. You may change that by clicking on the "Settings" tab, scroll down to "Referral Code", click "change", then when you are satisfied with your changes, press "Save Changes"

To create a product link for each product:

1. Click on "Marketing Tools"
2. Each product page link for the post is in the media assets at the bottom. When you click it, the link is automatically copied.
3. Paste the product link in the field below "Paste product page link."
4. A new link will populate in the "Your generated link" field.
5. You can either copy it or save it. If you copy it, you will need to generate the link again. If you save it, it will be saved in the History section below (and above the Media Assets.)
  - a. If you save the link, you will need to click ... then when the menu opens, click "Copy Link."

Next week, we will get into email promotions. Stay tuned!
