(819) 326-5454

I Gabriel Menard, Charles Menard owner proprietor and chief of operation and green upkeep (Charles Menard) would like to share my experience using Vital Humic Turf and other products develop by ALC Bio Innovations Inc.

Vital Humic Turf was a great organic solution for me and my problems with the greens at the beginning of the summer season. it was easy to use and the result were amazing. Versus other product that I have used in the past that were very expensive and did not perform very well and were stressful to the young grass sprout.

With Vital Humic Turf I was able to reduce my use of fungicide and also the time of applications and diminish the use of chemical fertilizers.

All in all I would recommend to anybody this product Vital Humic Turf.
