

## VersaStream<sup>®</sup> CO<sub>2</sub> Sampling Lines

### Available CO<sub>2</sub> sampling lines

**Nasal Sampling Line**

**Nasal Cannula**

Available in Adult, Paediatric and Infant sizes & also available with O<sub>2</sub> delivery

**Nasal/Oral Cannula**

Available in Adult and Paediatric sizes & also available with O<sub>2</sub> delivery

**Airway Adapter Sampling Line**

Available in Adult/Paediatric and Infant/Neonatal sizes.

Also available as separate sampling lines and a range of airway adapters.

### Available for short-term and long-term applications

Short Term  
Monitoring  
≤ 24 hours

Long Term  
Monitoring  
≤ 72 hours

### Compatible for use with:

**Viamed VM-2500 series**  
Masimo, Phase-In

**Luer Lock Male**

**Oridion**  
Nellcor, Covidien, Medtronic

### Why VersaStream<sup>®</sup> CO<sub>2</sub> sampling lines?

- One-piece sampling solution
- Cost-effective alternative to Nafion<sup>®</sup> tubes
- The gas-selective non-porous material facilitates fast and complete removal of condensation from the sampling line
- The integrated bacterial filter prevents contamination
- Reliable measured gas values, due to negligible dead space volume of the filter - even in cases of high respiration rates
- Integrated bacteria filter and water removal reduces the number of patient circuit parts and speeds up patient monitoring preparation time
