

GUIDE TO

REUSABLE GLASS SNIFTER & SNORTER WITH FRESH CASK ALE

SHELF LIFE

Your beer stays fresh for **7 days** unopened.

But once opened, drink within **24 hours**.

Always drink before the Best Before date.

STORAGE & SERVING

To enjoy your cask ale at its best, keep it cool, around 8-12°C, and out of direct sunlight.

Or if you prefer your cask ale a little colder, it may be kept in the fridge but may develop a “chill haze”, making it slightly cloudy. This won't affect the quality or taste of your cask ale.

CLEANING

When empty, give the Snifter or Snorter a quick rinse and return it to the Brewery for a fresh refill. Your favourite tipples will taste even better as every time you reuse your Snifter, you save money and there is one less plastic bottle in the world.

REFILLS & REFUNDS

If you order your refill for Click & Collect or Local Delivery, you will be charged the price shown, which includes the £3 deposit for a Snifter and a £5 deposit for a Snorter.

But don't worry, we will either:

Refund your deposit on Click & Collect

If you return the Snifter or Snorter clean and undamaged to the Brewery for a refill or

Refund your deposit on your online order

When we deliver your fresh beer, our driver will pick up your clean, empty Snifter or Snorter and we will then refund your deposit.

RECYCLE

Glass can be recycled at end of life.

Plastic cap widely recyclable
