Fire Classification	Crib 5 and Schedule 1, Part 1 of the Furnishings and Furniture (fire)(safety) Regulations 1988 (amended 1989)
Bass Trap Description	Plain 12" cube

Description

The most effective means of acoustic treating a room for its bass response, especially in small and difficult to control rooms, is by treating the tri-corners of the room. This is where the three corners of the room come together- the wall-to-wall corner and the two wall-to-ceiling corners. Very often when space is at a premium you need to make the most of every space you have for room treatment. As bass tends to build in corners, and especially so in the tri-corners of a room, you need to make sure you have addressed that possible cause of distortion with effective room treatment.

The Bass Trap Corner Fill enables you to easily treat the tri-corner by placing this cube in the corner and running any of our 12" wide bass traps from it. Using these Bass Trap Corner Fills gives you a much neater finish than trying to cut or trim bass traps at 45° angles and room response is improved at the same time.

The acoustic foam we use conforms to the more stringent fire tests of Crib 5 and Schedule 1, Part 1 of the Furnishings and Furniture Regulations so you will have peace of mind that the product you are using is safe also. And you also have our guarantee that the foam will stand the test of time. The colour we use has been carefully selected to ensure that it doesn't quickly discolour or fade over time. You won't have the problem of the foam crumbling and turning to dust either. We know that treating your studio is a big investment and we want to make sure that your investment stands the test of time. The only way to ensure that is by sticking with Advanced Acoustics. We have many years of experience in acoustic treatment and soundproofing. Acoustic Treatment and Soundproofing are the only products we deal with. You won't see us selling any other forms of foam or bedding. Acoustic foam is all we do and we are very good at it as our outstanding feedback and previous customers will testify. Our products have been used by a full host of companies including the BBC, Williams F1 Team, McLaren, Cisco, Cadburys and ITN just to mention a few.

This item is kept permanently in stock. The foam we use is an open cell polyurethane acoustic foam and is available in charcoal only.
