Description

Sometimes when it comes to Bass Trapping you need something a little larger than usual. If your room has a specifically poor bass response or you have very low frequencies you need to take control of then the MAXXX Bass Trap has to be the one of choice. The MAXXX Bass Trap is based on our best selling Original Bass Trap. The only difference between the Original Bass Trap and the MAXXX Bass Trap is its oversized dimensions. The MAXXX Bass Trap is a massive 24" wide which means it has the density and depth to control pretty much any frequency you throw at it.

These Bass Traps are extremely large units so it is best to make certain you have the space for them. If you do have the space for them say goodbye to any bass issues.

The acoustic foam we use conforms to the more stringent fire tests of Crib 5 and Schedule 1, Part 1 of the Furnishings and Furniture Regulations so you will have peace of mind that the product you are using is safe also. And you also have our guarantee that the foam will stand the test of time. The colour we use has been carefully selected to ensure that it doesn't quickly discolour or fade over time. You won't have the problem of the foam crumbling and turning to dust either. We know that treating your studio is a big investment and we want to make sure that your investment stands the test of time. The only way to ensure that is by sticking with Advanced Acoustics. We have many years of experience in acoustic treatment and soundproofing. Acoustic Treatment and Soundproofing are the only products we deal with. You won't see us selling any other forms of foam or bedding. Acoustic foam is all we do and we are very good at it as our outstanding feedback and previous customers will testify. Our products have been used by a full host of companies including the BBC, Williams F1 Team, McLaren, Cisco, Cadburys and ITN just to mention a few.

This item is kept permanently in stock. The foam we use is an open cell polyurethane acoustic foam and is available in charcoal only.
