

san-I-tize

KEEPING YOU VIRUS-FREE

CORPORATE PROFILE

Established in 2006, SAN-I-TIZE specializes in the production and procurement of Medical Protection Supplies and PPE equipment around the Globe. Our clients include International Governments, Private and Public Hospital Groups and Large Corporates. We manage the entire integration of the supply chain – from factory floor through to delivery. Your requirements are in professional hands through our established relationships with reputable medical factories and logistics specialists around the world.

AUGUST
2020

SAN-I-TIZE AIMS TO BE RECOGNIZED
AS A WORLD LEADER IN EFFECTIVE
PREVENTATIVE HEALTH MANAGEMENT
SOLUTIONS AND THE PROVISION OF
HIGH QUALITY MEDICAL PROTECTION
SUPPLIES AND PPE EQUIPMENT.

SAN-I-TIZE has extensive experience in the fields of public health and medical supplies. Governments, private and public hospital groups, corporations and Forbes 100 companies trust **SAN-I-TIZE** with the manufacturing, sourcing, importation and distribution of crucial medical and sanitation supplies.

FIRST PORT OF CALL

Based at our wholly owned warehousing and retailing facilities at No's 3 – 7 Beach Road, Maitland in Cape Town (South Africa), and also our iconic NATIONAL BANK HOUSE at No 84 Market Street, Johannesburg, **SAN-I-TIZE** is centrally and strategically located to service the needs of all continents.

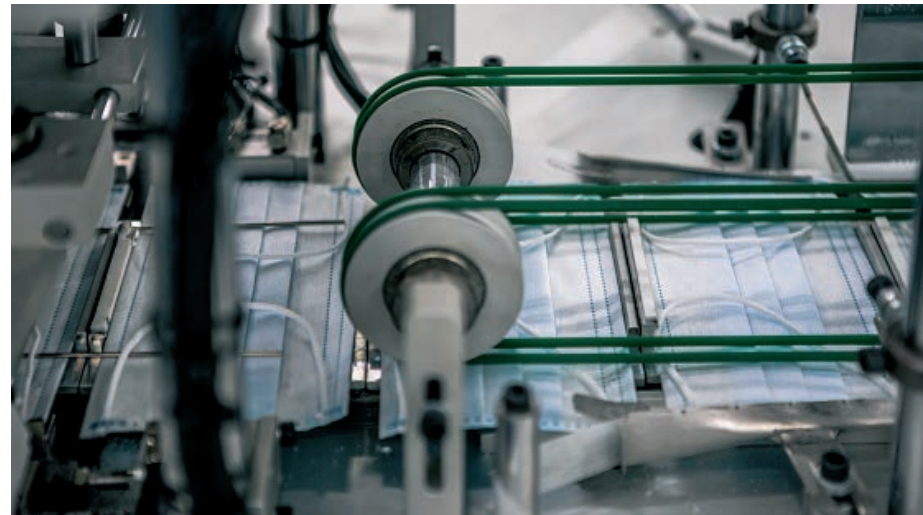

WAREHOUSING FACILITIES

Having started courier and logistics giant BERCO EXPRESS in Africa back in 1991 (now ARAMEX), our principals have extensive experience in freight and logistics, with access to large warehousing and logistics facilities around the globe.

Over the past 15 years, **SAN-I-TIZE** has established relationships with some of the largest and most reputable medical factories in Malaysia, Vietnam, India and China. We carefully manage and monitor the entire supply chain - from manufacturing to delivery to your door.

**MANAGING THE
SUPPLY CHAIN**

YOU CAN'T BUY A GOOD REPUTATION

Our background in the freight and logistics business and our relationships with factories in the East spanning over 15 years, have given our directors a solid grip on both reputable supply chains and reliable freight/logistics sources.

In a PPE environment filled with minefields of opportunistic and/or fake products, representatives and companies, our warehouses and stock are open for visitation and/or scrutiny every working day of the week.

Our extensive logistics experience enables us to provide versatile solutions to global health situations.

"Reputation is only a candle, of wavering and uncertain flame, and easily blown out. But it is the light by which the world looks for and find merit." - James Russel Lowell

"A good reputation is more valuable than money." - Publilius Syrus

KEEPING YOU VIRUS-FREE

SAN-I-TIZE has arrangements with ANTONOV AIR, enabling us to move large quantities of medical and PPE equipment to almost anywhere in the world at short notice. Our dedicated charter planes can each carry up to 1 000 cubic meters of freight.

In addition, we also have exclusive arrangements with privately owned aircraft: A pair of ANTONOV AN-124 freight planes and two smaller Boeing 777's are on standby to fly your emergency supplies to your destination of choice.

SAN-I-TIZE can move emergency supplies not only at lightning speed, but also at very competitive prices.

EFFICIENT & COMPETITIVE

**LOGISTICS YOU
CAN TRUST**

UV-C sanitizing is the obvious 'clean' solution to a growing global pandemic problem. SAN-I-TIZE leads the way with FAR UV-C 222 technology - proven safe for human use.

SAN-I-TIZE IS A LEADER IN UV-C SOLUTIONS

For centuries doctors have used the **healing power of the sun**. Because it is free, Big Pharma has tried to nullify or avoid UV solutions to combat disease. Ultraviolet germicidal irradiation is a disinfection method that **uses clean, short-wavelength ultraviolet light to kill or inactivate microorganisms**. It does so by disrupting their DNA and destroying the proteins and nucleic acids that these organisms need - leaving them unable to perform vital cellular functions and thus **rendering them harmless**. Research has proven **UV-C light to be the most effective solution to combat harmful bacteria and viruses** - outperforming any disinfectants currently in use by far. Whilst UV-A and UV-B rays are responsible for premature skin wrinkling, sunburns and skin cancers, UV-C's wavelength is too short to cut through Earth's atmosphere and reach our skin, so it's not a threat to sunbathers. BUT it can be re-created in a lightbulb.

Much research has gone into the advantages of UV-C sterilization. It is now scientifically proven that **UV-C degrades the genetic material of microbes or viruses so badly that they can't multiply**. *"It doesn't kill the virus - it renders it unable to reproduce,"* says Jim Bolton, an environmental engineer at the University of Alberta. Recent pandemics have made UV-C light disinfection much more popular, with hospitals, airports and even the New York City subway system buying into the new UV-C technology. ***Talk to us about leading edge FAR UV-C 222 solutions to keep you safe and your environment virus-free.***

All **San-i-tize** products adhere to the highest safety standards. We don't manufacture, import or distribute grey products. Full jurisdiction-based certification is available on our entire product range.

**HIGH STANDARDS.
HIGHER QUALITY.

PERSONAL PROTECTIVE EQUIPMENT

N95 MASKS FOR MEDICAL USE (5 PIECES)

Specifications:

≥95% BFE.
(Bacterial Filtration Efficiency).
Fluid resistant mask.
Contains no components made from natural rubber latex.
Braided headbands, cushioning nose foam, and light weight construction for comfortable wear. Disposable.

MEDICAL SHOE COVERS (3 PAIRS)

Specifications:

Sterilized, Non-woven fabric.
Disposable.

CLASS II MEDICAL PROTECTIVE SUIT (STERILIZED) (1 PIECE)

Specifications:

75 ± 3 gram m².
Anti-alcohol, anti-plasma, water-repellent.
Non-toxic and tasteless, highly effective bacteria isolation.
Non-woven fabric, sterilized. Disposable.

MEDICAL NITRILE GLOVES (3 PAIRS)

Specifications:

Latex-free, powder-free, sterilized.
Disposable.

ANTIBACTERIAL HAND SANITIZER (100 ML) (1 PIECE)

Specifications:

70% Alcohol, kills 99.9% of germs.
Fragrance-free.

MEDICAL SAFETY GOGGLES (1 PIECE)

Specifications:

Anti-fog, waterproof, shockproof lens.
Wrap-around lenses, medical splash goggles. Disposable.
