

Instruction Manual

Push Scooter

Note

- We suggest 1 person to take charge of the assembly.
- Assembly takes 4 - 5 minutes.
- Unwrap the Push Scooter parts and place them as shown in the image for convenient assembly.
- Secure all screws mildly during assembly. Tighten after you complete the assembly.

Step - 1

Insert the front wheel base to scooter base unit (as shown in the picture)

Step - 2

Now insert the handle bar unit into the front wheel base unit
Make sure both holes in handle and wheel base face front side
slide it gently

Step - 3

Check for the center alignment of both the holes before inserting the screw and then insert the allen screw into the hole as shown in the picture

Step - 4

Using the given allen key gently tighten the screw. Do not overtighten the screw

Step - 5

Rotate the handle fully (360 degree) and ensure the handle is firmly fixed.

Your Push Scooter is ready for the little one to vroom around.

Thank you for getting me home!
