It is a perfect new born equipment to help babies observe and understand the world around them.

Baby gyms are perfect for hanging visual mobiles. Visual mobiles and other elements encourage your baby to track and observe them. Providing just the right amount of visual stimulation helps the development of the visual sense.

Tactile mobiles encourage your baby to reach out and touch them, helping your baby improve their tactile sense

This gym is easy to assemble and store when not in use. It adds to the beautiful aesthetics of your nursery.

Mobile Elements

Books with wooden pages and printed with child safe ink are specially designed for very young babies but are fun for even toddler and older children to explore. Let's look at some of the benefits of these unique books.

Sturdy

Since the pages are wooden instead of paper, you can give them to your child without the worry of them tearing it. No matter how they hold the book, turn in around, drop it down and pick it up again, it will stay intact.

Rattle can mildly stimulate your child and ensure to capture and slowly help them focus their attention towards the source of sound. This also can give them a sense of direction. When you move the rattle over your baby they will tend to try and grasp. This ensures the Hand-eye coordination is addressed. Slowly Move the rattle across the child's face and let them track the movement this process will help with Focus and Attention.

When your baby is reaching out and grasping the toy their Fine motor skills are developed. When they rattle the toy their sense of sound develops. This rattle is perfectly shaped for grasping and rattling.

Here are a few reasons why the balance beam is great addition to your child's play space especially in these times when stepping out isn't an option for many.

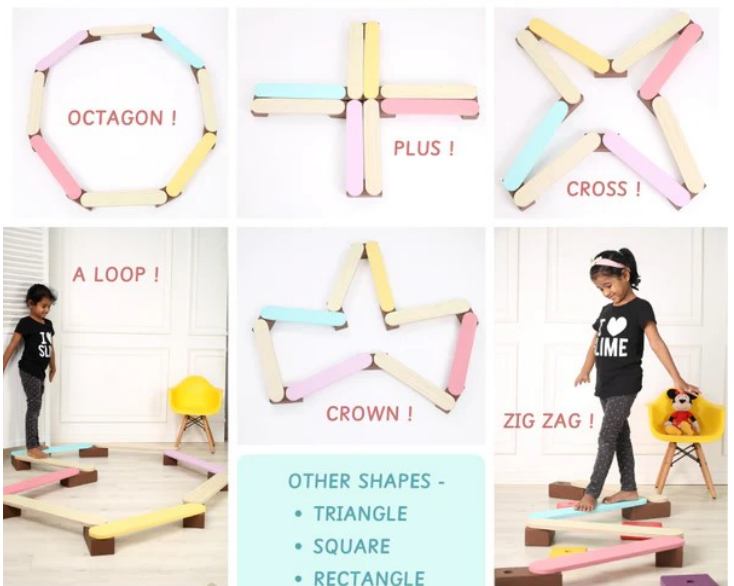

- . Aids Proprioception
- . Coordination
- . Balance
- . Social play
- . Build focus and concentration
- . Postural control
- . Strengthens the core
- . Improve visual perception

ARF014

₹ 6,999

How to use Balancing Beam

The Ariro rocker is made of solid wood with a wide base for safety. Its simple design helps to clean and maintain it without any hassle. The wide seat and wooden handles help the child stay steady as they rock back and forth.

Rockers help children calm down and relax

There is a reason why we rock babies to calm them or help them sleep. The rocking movement may help regulate the heart rate. Research also links rocking with good blood circulation. Even when they grow into toddlers and older children, rocking has a calming effect and helps children feel secure and relaxed.

ARF010

₹7,999

A child on the rocking horse is the most iconic image in a nursery or child's room. Although through the years, children's toys have seen many changes, the quintessential horse rocker seems to have survived it all and still remains an essential in every household. And there is plenty reason as to why children today still love the rocking horse as much as the generations before them did.

The Airo rocker is made of solid wood with a wide base for safety. Its simple design helps to clean and maintain it without any hassle. The wide seat and wooden handles help the child stay steady as they rock back and forth.

Why Spinning Drum?

Spinning drum is an ideal toy to enable the child to exercise their core muscles and wrist rotation. As the child uses this toy from lying on their tummy to playing while sitting up straight, their relationship with it could last quite a while. The wooden balls inside the drum ensures to keep their curiosity intact.

How to offer a Spinning Drum?

The toy should be placed in front of the child as they are lying on their tummy. Place your palm on the drum and spin it slowly and gently towards the floor. Repeat the action 2 or 3 times for the child to observe and offer the toy to the child. Let them explore.

As the child grows up, have the drum on their shelf. They can pick it up and explore at their will.

ARSS001

₹ 1,350

A sensory bin is a toddler sized table with two metal bins, that allows a child to explore different materials. This bin creates opportunities for them to feel, investigate a variety of things with varying textures while the mess is contained inside this bin.

Ideal for an enriching tactile experience. The activities in the booklet will ensure the child gets an opportunity to feel and explore different materials.

Offers possibilities for the work of both hands simultaneously as most activities require the use of both hands at the same time. This will refine their movements

Aids Hand - Eye Coordination

Enriches sensory play

Aids Independent Play

Introduction to art

ARF019-B

₹8,500

ARF019-P

₹8,500

The toddler work space can be set up either in the child's room, the living room or even next to the area where the parents work. It should be a clutter free space with the work shelf with about 6-8 developmentally appropriate activities and the work table and chair placed close to the shelf.

Toddlers thrive on order and having a designated work area builds into this sensitive period thereby enabling them to successfully navigate the environment.

A child sized work table and chair provides children with the freedom to move their bodies and the furniture by themselves which further develops their self-confidence

ARF018

₹ 7,999

Developmental Aids

The Low Shelf also called a Montessori toy shelf/Wooden toy shelf/ Montessori Infant Shelf or Montessori open shelf is an essential part of every Montessori classroom and home that follow the method. It is a low wooden shelf at the child's height and is used to display toys or developmental aids according to the child's need and interest at that time. A unique feature of the low Montessori shelf is that it doesn't have any doors and is designed in a manner that is open and accessible to even a slithering or crawling child.

The rounded edges and purposefully done simple design ensure that your child's fingers don't get caught anywhere while accessing toys from this shelf.

Climbing arch for toddlers

The pickler arch is the child's first climbing frame and is ideal for a child to pull up to stand and to start their climbing journey

Gross-motor Development indoors

The arch supports the child's need for gross motor movement within the safety of staying indoors. Climbing is a natural human instinct and the arch nurtures this instinct and also supports their need for exploration

ARF007-SC
