# DIREXTRA

Dirextra Business School has been founded in 2003, specifically oriented towards the International Construction Infrastructure, Engineering and Oil & Gas Sector.

It is aimed at those who, after their degree or during their professional careers, intend to undertake an in-depth study of General Contracting for Large Works, Construction Infrastructure, Engineering, Piping, Drilling and Oil & Gas Sectors.

Dirextra has the objective of adding value to entrepreneurial spirit to not only produce "Business" but also to spread specific know-how in the Construction and Oil & Gas Sector.

Dirextra Business School is the only provider able to place highly qualified professionals (engineers, architects, lawyers, economists and so on) within the Construction and Oil & Gas Companies who sponsor our placement courses.

Amongst some of our significant successes we would like to highlight our placement courses for Professional Engineers Construction and Oil & Gas Sectors. It will run every year for two cohorts: Manchester starting in March and Malta starting in September.

"Excellent Training and Know-how for Construction Infrastructure, Engineering and Oil & Gas Sector".

This formula has been developed and perfected by Dirextra to offer new opportunities to future generations and to offer skilled professional engineers for Construction and Oil & Gas Companies.

"Building Construction Leaders of the Future" is Dirextra's mission statement which embodies the Group's vision for the infrastructure industry.

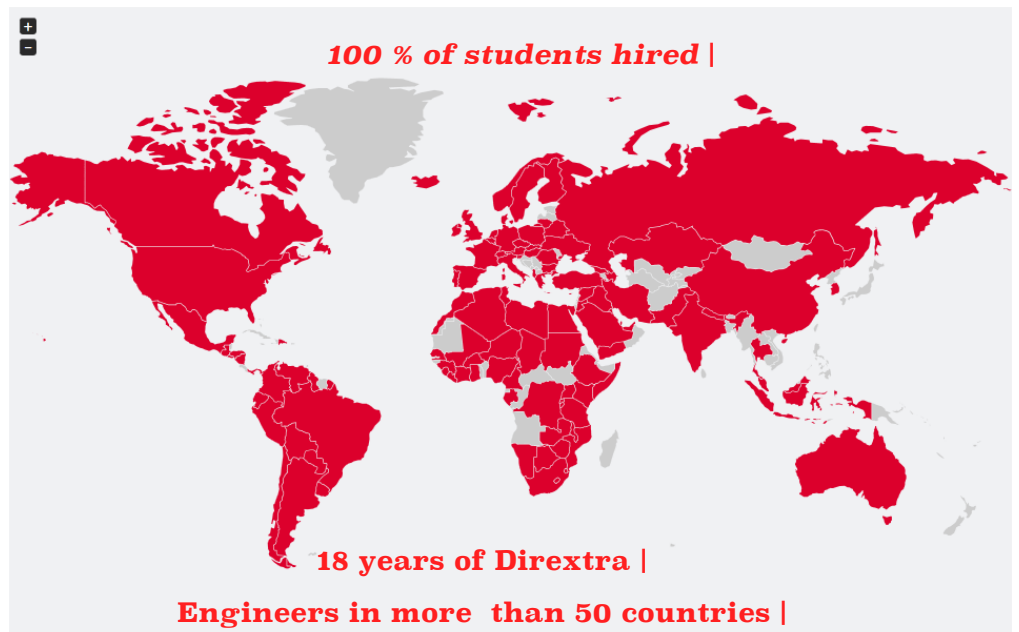

# DIREXTRA

Dirextra has more than 2,300 Alumni Engineers who have worked on the Construction of Major Infrastructure around the world.

Dirextra Alumni Engineers have built, are building and will build the most important infrastructure projects on the planet. There is no growth without Engineers.

Investment in infrastructure can drive global growth and Dirextra will drive the Engineers.

## DIREXTRA PROGRAMME FEATURES IN NUMBERS

# DireXtra®

# OUR BRANCHES

Our headquarters are located in Manchester (United Kingdom), from where we develop and manage our network of Construction, Engineering and Oil & Gas Companies. Our staff speaks different languages (English, Spanish, Italian) so we are able to manage clients everywhere.

Dirextra Sales Staff travel the world to visit potential companies interested in hiring our professional engineers.

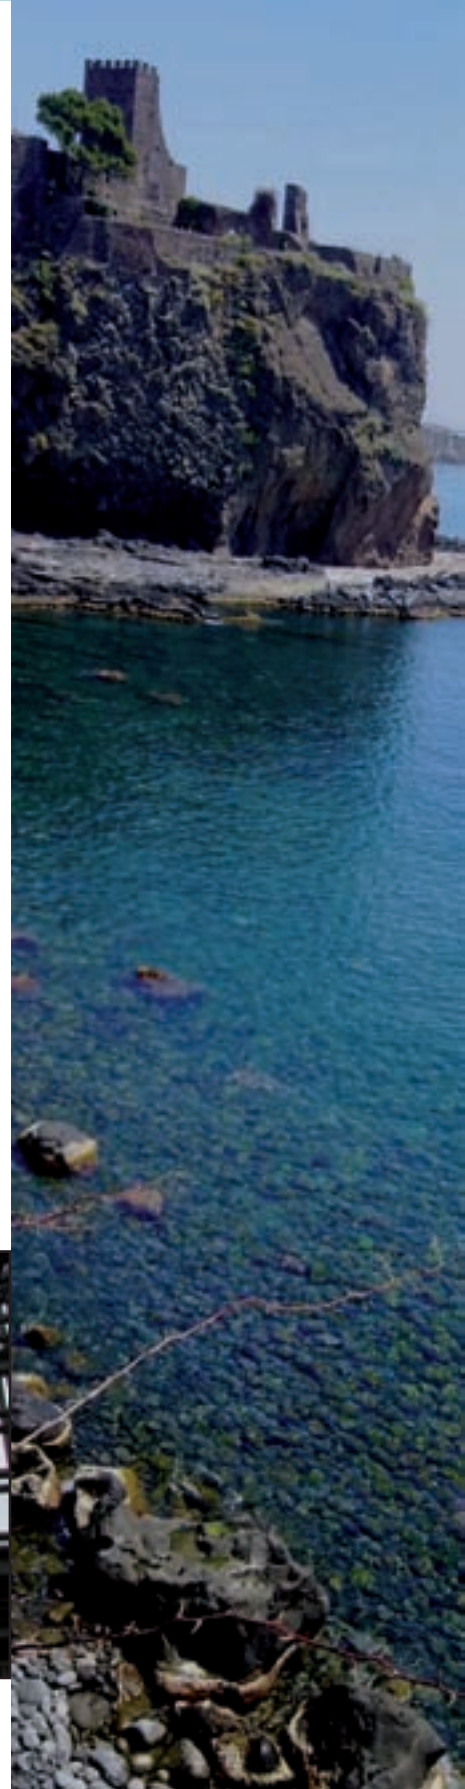

Our training rooms at the Manchester and Malta offices are specially designed for higher education and conferences. They are equipped with cutting-edge presentation technologies, supported by professionals in the higher education sector.

SETTORE COSTRUZIONI

# MASTER DI IMPRESA SETTORE COSTRUZIONI

The main purpose of our placement courses is to enable our students to be hired after a six-month training period with Construction or Oil & Gas Companies.

Here our sponsoring companies:

Our placement courses for engineers, lawyers, architects, and economists in the Construction and Oil & Gas Sector provide 100% employment..

# MINI MASTER

Mini Masters, a virtue of Dirextra, are specific Higher Education courses, accredited by several awarding bodies, with the aim of ensuring niche specializations with a "high professional standard".

Dirextra is recognized as a leader on the construction market for the provision of in-depth courses and mini masters in the field of construction and oil and gas which are treated exclusively by expert speakers in the sector, of reputed reputation and specific experience.

Our technical and legal consultants, thanks to an in-depth knowledge of the subject, are able to provide a practical cut to the mini master so that learners can immediately use the knowledge acquired during the days in the classroom, inside of one's own working context thus maximizing the resources employed.

Among the great successes of Dirextra we want to include the following

1. Mini Master in Project Management
2. Mini Master Planning Primavera P6 based on Knowledge of P6 EPPM (Enterprise Project Portfolio Management)
3. Risk Management
4. Mini Master Cost Control a tool that allows you to analyze performance of the project
5. Mini Master in Petroleum Engineering

# SOFT SKILLS COURSES

Soft skills as "desirable qualities for certain forms of employment" they include common sense, the ability to deal with people, and a positive flexible attitude.

Soft skills determine how you interact with your team. They're important for strong leaders in any type of job and industry. And if you're lucky - or savvy enough - to have recruited people with strong soft skills, you'll know they're great at building relationships with their colleagues.

Unlike the more technical skills, AKA hard skills, Soft skills can be easily developed by awareness and courses.

Let's take a look at some of the most important soft skills that are key if you're striving to be a strong leader.

1. communication
2. empathy
3. delegation
4. flexibility
5. teamwork
6. problem-solving
7. leadership

That's the 7 soft skills that are crucial for strong leadership that you can develop through the following Dirextra's online courses

# CONSTRUCTION LEGAL ENGLISH

Dirextra organizes Full-Immersion Advanced English courses with specific orientation to the construction sector. Oriented to those who experts in the sector intend to go to work abroad and require an improvement of the English language strongly oriented to the sector.

The minimum entry level B1 certified by an appropriate body. Classes will be organized in such a way as to maintain a level homogeneous starting point that allows better learning of learners.

Normally engineers, lawyers and architects who intend to work abroad have a language level inadequate English and above all a knowledge of the language on books or conversationally, not enough to deal with with professionalism the new experience you intend to undertake.

In this context, knowledge is of particular importance of the English language with particular reference to the technical terms-legal requirements of the works contract.

The postgraduate course is an enriching experience training that ensures high scientific skills and facilitates the development of professional relationships in international contexts.

# HEALTH AND SAFETY AND NEBOSH COURSES

## HEALTH AND SAFETY COURSE IN CONSTRUCTION

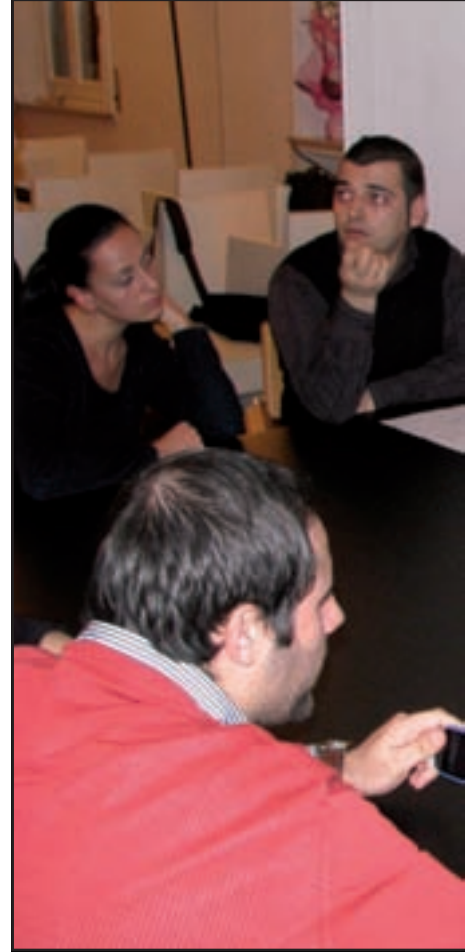

At Dirextra, we provide a wide range of e-learning courses from health and safety courses in construction sector to food hygiene in hospitality sector.

## NEBOSH COURSES

NEBOSH (National Examination Board in Occupational Safety and Health) is an independent British body which aims to train professionals and workers in the field of safety and health in the workplace. NEBOSH certificates and diplomas are the most accredited professional awards worldwide in the security sector. A significant number of jobs in Construction Infrastructure and Oil & Gas Sectors adverts specify NEBOSH qualifications, demonstrating the high standard of NEBOSH courses and training.

For companies please contact us if you are interested in buying courses for more employees:

1. In-Company Classroom - course plus exam. Effective and team building efficient. Available in England and in Italy. To ask for a quote write to [master@dirextra.com](mailto:master@dirextra.com)
2. Online - ideal for dynamic Construction and Oil&Gas Companies with training teams across multiple sites around the world or individuals. More flexible, less expensive and less time consuming in travelling and commuting. To ask for a package for more employees please write to [master@dirextra.com](mailto:master@dirextra.com)

# DIREXTRA HEAD HUNTING

We identify and report to the requesting companies profiles of engineers, architects and jurists who work in the construction sector. We only report resumes of people we know directly.

Dirextra Head Hunting takes care of following the careers of the former students of the Construction Sector Masters of Dirextra from the first job placement and for all subsequent career steps.

Thanks to our experience in the construction sector we are expert connoisseurs of the professional skills on the market and we are therefore able to identify the person who could be suitable for a specific job position.
