1000 hours (6 months) of practical experience in Infrastructure Construction Site

The Placement Course for Professional Engineers in the Construction Infrastructure sector, accredited by CPD Certification Service in London, aims to train engineers to become managers in Construction Infrastructure Companies who are able to manage business processes and construction site procedures.

The Course is delivered with the support of Multinational Companies operating worldwide.

Dirextra has more than 2,300 alumni engineers who have worked on the construction of major infrastructures around the world.

Kick-start your career with a Dirextras' programme in Construction Infrastructure. Dirextra is a leader in the field of Construction Infrastructure and Engineering education.

Excellent Training and Know-how for the Construction Infrastructure and Engineering sectors This formula has been developed by Dirextra to offer new opportunities to future generations and to offer skilled professional engineers to Construction Companies.

The Programme is aimed at graduates in Civil, Geotechnical, Transportation, Construction Management, Infrastructure, Road, Earthquake, ITS, Rail transport, Hydraulic, Bridge, Environmental, Surveying, Structural, Coastal, Project, Municipal, Tunnelling, Building, Sewage Engineering.

## EMPLOYMENT OPPORTUNITIES

The programme is supported by large Italian Multinational Infrastructure Companies operating all over the world aiming to hire young engineers. 100% successful placement in previous cohorts.

## DURATION AND TRAINING

Total time: 1200 hours, of which 1000 are spent on work placement.

- 2 months (200 hours) of training in the classroom (Manchester) or from a remote location in videoconference or video recording.

-

- 6 months (1000 hours) of training on a Construction Infrastructure Site. Accommodation and board will be provided by the hosting company

## PROGRAMME TEACHERS

The teaching is assigned to experts with years of experience in the Construction Infrastructure industry coming directly from the sponsoring companies (entrepreneurs, general managers, project managers, technical managers, site managers, human resources managers, lawyers, etc.)
