### Face Masks

**Face Mask**  
Civilian Use  
(Nomad Mask)

- **Testing and Approval**  
  Not FDA Approved. Designed for civilian use.

- **Filtration**  
  >95-98% filtration efficacy  
  Lab tested in China  
  Does NOT provide the wearer with a reliable level of protection from inhaling smaller airborne particles and is not considered respiratory protection.

- **Intended Use and Purpose**  
  Fluid resistant and provides the wearer protection against large droplets, splashes, or sprays of bodily or other hazardous fluids. Protects the patient from the wearer’s respiratory emissions.

- **Face Seal Fit**  
  Loose-fitting

- **Leakage Seal Check**  
  Leakage occurs around the edge of the mask when user inhales.

- **Use Limitations**  
  Disposable. Discard after each patient encounter.

*We advise using these masks in lower contact situations.*

### Respirators

**KN95 Respirator**  
Civilian Use  
(Nomad Mask)

- **Testing and Approval**  
  Not FDA or NIOSH approved. Designed for civilian use.

- **Filtration**  
  >98% filtration efficacy  
  Tested by FDA  
  Does NOT provide the wearer with a reliable level of protection from inhaling smaller airborne particles and is not considered respiratory protection.

- **Intended Use and Purpose**  
  Fluid resistant and provides the wearer protection against large droplets, splashes, or sprays of bodily or other hazardous fluids. Protects the patient from the wearer’s respiratory emissions.

- **Face Seal Fit**  
  Tight-fitting

- **Leakage Seal Check**  
  When properly fitted and donned, minimal leakage occurs around edges of the respirator when user inhales.

- **Use Limitations**  
  Ideally should be discarded after each patient encounter and after aerosolgenerating procedures. It should also be discarded when it becomes damaged or deformed; no longer forms an effective seal to the face; becomes wet or visibly dirty; breathing becomes difficult; or if it becomes contaminated with blood, respiratory or nasal secretions, or other bodily fluids from patients.

**N95 Respirator**  
Civilian Use  
(Nomad Mask)

- **Testing and Approval**  
  Evaluated, tested, and approved by NIOSH as per the requirements in 42 CFR Part 84

- **Filtration**  
  Filters out at least 95% of airborne particles including large and small particles.

- **Intended Use and Purpose**  
  Reduces wearer’s exposure to particles including small particle aerosols and large droplets (only non-oil aerosols).

- **Face Seal Fit**  
  Tight-fitting

- **Leakage Seal Check**  
  When properly fitted and donned, minimal leakage occurs around edges of the respirator when user inhales.

- **Use Limitations**  
  Ideally should be discarded after each patient encounter and after aerosolgenerating procedures. It should also be discarded when it becomes damaged or deformed; no longer forms an effective seal to the face; becomes wet or visibly dirty; breathing becomes difficult; or if it becomes contaminated with blood, respiratory or nasal secretions, or other bodily fluids from patients.

*We advise using these masks in lower contact situations.*
