

# CLUBHOUSE CHAIR

Finished in black leather and dark stain but with the ability to customise the wood portions. This is the leather chair that lets you be serious about relaxing, and no self righteous office, lounge or bedroom would be complete without this lurking in the corner. Perhaps you could create a sumptuous reading nook when completing this look with a free standing bespoke lamp, and soften with textured throws from our collection.

*Every piece within the Artisan Collection includes a colour and style consult prior to being hand painted and completed in your chosen finish in the TR Studio*
