## **CURVE TABLE**

The design intent behind the Curve Table was to create a more sculptural response to cable management, in contrast to the standard flush mounted power box.

Curves and radii throughout the table accentuate the cable management process. Cables can be pulled through either end or the center of the curved under frame and gathered below the table surface on the carved timber tray. These same cables are then accessible through the slot running down the center of the table top.

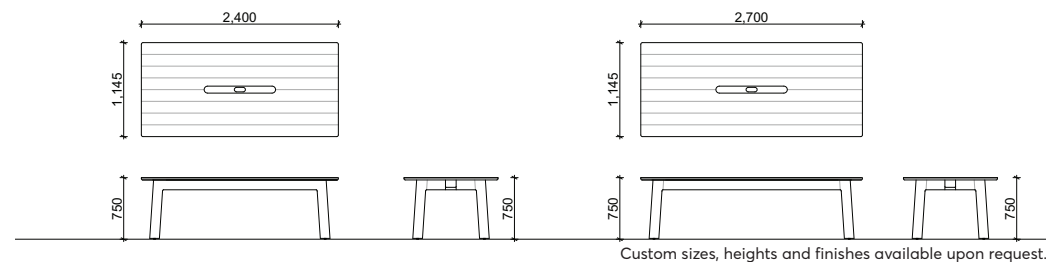

Through dedication to traditional joinery techniques such as lamination bending as well as real mortise and tenon joinery, the Curve Table embodies the warmth and character found only in handcrafted fine furniture.

Integrated power and data options available upon request.

Handmade in Melbourne.

<b>DESIGNER:</b>	Josh Carmody
<b>YEAR OF DESIGN:</b>	2015
<b>DESCRIPTION:</b>	Conference Table   Meeting Table
<b>MATERIAL:</b>	U.S White Oak   U.S White Ash   U.S Black Walnut
<b>FINISH OPTIONS:</b>	Clear Semi Matte Oil   Clear Polyurethane Semi Matte
