STUDIO TABLE

Designed to add a dose of handmade warmth to various locations throughout open plan workplaces, tables from the Studio range fit comfortably anywhere from corporate meeting rooms, to residential dining rooms.

The chamfers and bold radius profiles throughout the piece create a modern yet restrained form.

This refined aesthetic is reinforced by traditional craft methods such as mortise and tenon joinery throughout the frame, as well as custom made button fixings connecting the table top to the table frame.

Handmade in Melbourne.
