# CASTING A SPELL

*While there are so many spells out there that can help you get what you want, the truth of the matter is, there will be times when you would want to use your own spell. It is only natural, and it lends a very personal note to your request.*

*With the gazillion spells out there, there will come a point where you won't be able to find what you're looking for in a book. Those times call for a spell that you personally crafted.*

*Making your own spell can be very intimidating but it's really not as hard as you think.*

*Here are the steps to help you craft your own spells:*

## 1.

### ***FIGURE OUT YOUR GOAL***

You have to ask yourself what you are trying to accomplish. Be clear with what you want. Do you want success? Love? Friendship? Whatever it is, make sure you are clear and sure of what you want. Say something like, "I will get that promotion!" or "I will meet someone I am compatible with!"

**2.*****Determine the things you will need to achieve your goal***

This is spell casting so you will be needing the help of herbs, incense, candles or gemstones. A little research will help as to what will bring the best results with the use of specific herbs, incense, candles, and stones. Like for example, a black candle is for wisdom, blue is for weight loss and forgiveness, and red is for passion and vitality.

**3.*****Is time an important factor?***

In some Wiccan traditions, moon phases are very important considerations when casting a spell. Generally, positive magic or drawing spells are performed under the waxing moon. Negative magic is done under the waning moon. But don't let this limit you because not everyone follows it. If you feel a certain day of the week would be best for magick, then that's the best time to do it. But if you subscribe to a certain tradition, then it's best to respect what that tradition believes in.

**4.*****Will there be incantation?***

If your spell requires incantation or chanting, you better prepare for it. Who will you invoke and ask help from? Or will you just say something under your breath? Whatever it is, preparation goes a long way. Spell casting is not something you should do on a whim. You should be well-prepared since you are asking the divine for help and assistance. It's like being in your best behavior when talking to someone you admire. Preparation reflects respect, and respect for the divine will get you far in your magick.

## 5. *Do A Reversal Spell*

A reversal spell is something you do if something you think went wrong in your last spell. This will only work for the last spell you did. Think and reflect about how and why your spell went wrong. It is very possible that if you missed something, the gods will fill in the blanks and that's not always good! Say something along the lines of the following:

*"My spell went wrong,  
Please reverse it,  
Don't mess it up,  
And don't pervert it."*

# TIPS IN SPELL CASTING

*Casting a spell does not give you instant results. Sometimes it does take a while. Try looking at the bigger picture instead of waiting for what you desire you come true. The Universe may respond to your wishes in a different way, sometimes it may not give you what you specifically asked for, but give you something better.*

*Remember that magick is just a tool. You can cast a job or love spell the whole day but if you are just waiting around, locking yourself in the house and sitting on the couch, then you are just diminishing your chances of success of your spells.*

*Here are some tips for your spell casting:*

## TIP #

# I

### Examine the Problem

This step may make or break your spell. If you think the problem is lack of money or lack romantic prospects, you have to see that those are just symptoms of the real problem.

It may be that you lack money because you lack motivation and ambition. You probably have no romantic prospects because you lack self confidence in talking to people of the opposite sex. What I am getting is, sit down, find out the REAL problem, and then cast a spell for that. Once you acknowledge the real problem and address it, you will be surprised at the effectiveness of your spells.

TIP #

## 2 Have Clear Intentions

A person who wants money, and doesn't go deeper than that, will cast a spell to be wealthy, and will be met with nothing. Not a peep. Not a sign. What does it mean to be wealthy? You can be healthy, have a wide social circle, good social standing, and be considered wealthy. But if you think it simply as having money, and your heart and soul are not in agreement with it, then that will sabotage the success of your spells. Deal with your conflicting desires first and make sure every aspect of yourself is in agreement with what you are casting a spell for.

TIP #

## 3 Address Every Aspect of Your Desire

Your spell should not be left wanting. If you want a love partner, be explicitly clear about every quality you want that lover to possess, from the physical to the mental and spiritual. It would be useless to ask for a lover who you will end up having major and non-negotiable disagreements with. It is very possible for The Divine to misinterpret or fill-in-the-blanks of your intentions. So make sure you are explicitly clear in that. Take the time and write down the details.

TIP #

## 4 Let The Divine Handle It

After casting a spell, you have got to be patient and let the universe handle it. You are human and the reason why you are casting a spell is to ask for the assistance of the more capable gods and goddesses. Quit holding on to it and tracking its progress, because how would you anyway? Allow the magickal realm to do its work. You can only have control over what can be done before casting and in casting the spell. The answers will be given to you in due time and what has to happen will happen in due time.

If you wished for abundance in cash, the answer could take in many forms such as abundance in harvest, abundance in generosity from other people, and abundance in kindness.

TIP #

## 5 Always Put a Caveat In Your Spells

After spell casting, make sure to say "to do no harm, nor return on me." You can never be sure of how the universe will respond, so make a request that no harm or hurt will come to you or any of your loved ones as a response.

TIP #

6

## Pay It Forward

Be generous. Be appreciative. If the universe responds to your wishes in kind, then share it. This can also affect your success in magick and future spell casting. Consider this as a way of saying thanks for bounty you have been given. Consider this a your courtesy to The Divine.

TIP #

7

## Be Very Careful What You Wish For

Whatever it is that you ask for, make sure it is not a spur of the moment thing. Because there is no curse quite like a wish coming true. So please think carefully about it. Mull it over. And it would be best if you don't wish any harm on others.

# WEIGHT LOSS SPELLS

*"(Add vice here) is not a part of me,  
when the moon is dark, I will be free."*

- Beginning that night until the new moon, drink from the bottle of the ginger ale every day. As you do this, focus on your honest intention to get rid of your bad habit.
- Find a representation of your bad habit and totally destroy it. Break it, stomp on it while shouting:

*"(Add vice here) has no dominion over me!"*

- Feel the vice losing its power over you. Keep doing this until you feel a sense of calm and relief.
- Collect the remnants of your bad habit and place them in a container.
- Throw in the pine needles and the lemon rind.
- Whenever you feel tempted to slip back into your old habits, take a pinch of the mixture from the container and sprinkle it on the ground behind you.
- Walk away from it as you say:

*"(Add vice here) has no dominion over me!"*
